Trends/Issues:
- Loss of Staff with resulting needs for personnel searches and training, as well as a reduction of service hours for the reading room and the introduction of student monitors on the desk.
- Renovation of second floor will lead to relocation of staff and students to the 4th floor east and collections to the 4th floor west.
• There will be increasing digitization of University Archives materials with, when appropriate, destruction of originals.

• Digital curation and preservation is becoming increasingly important, but neither faculty nor staff are trained. We have only a faint idea of the dimensions of the problem.

• The archivists need to either make Past Perfect more accessible to staff and the public or to move files into CONTENTdm and make public what should be public and leave hidden information which should not be public.

• Cooperation with Systems and Technical Services will continue to be a high priority.

• The department needs to develop security and disaster procedures before something happens and as portions move back into the renovated second floor.

• The following positions need to be filled: department head, Rio Grande Historical Collections archivist, along with open staff positions.
