

The Buildings Of New Mexico State University

NMSU's Building History
Vol. 2

By Patricia Grumet

Facilities Space Management
New Mexico State University
P.O. Box 30001 MSC 3545
Las Cruces, NM 88003

To:
my colleague Ron Washburn,
my boss of three years, Jeff Miller,
Noe Rodriguez for his awesome drafting abilities,
the many NMSU faculty and staff who supplied me with information,
and my always supportive family.

Thank you

Fire Station

Constructed in 1965 at a cost of approximately \$35,000 the new fire station, much like it is today, became home to the university fire marshal and students who worked as firefighters. The 24-Hr. fire marshal for the new facility was Jay Sheehan who also served as an instructor. Jay and his wife, Evelyn, lived in the station “set off from the two dormitory rooms occupied by four students”. The new station was state of the art with new kitchen appliances and a “communications room” which one student called the “heart of the fire station”. The new communications room allowed all of the phones to be linked and the immediate 2-way radio to the fire chief or other departments. Also the new phone system included an intercom system to constantly monitor the phone board. They were able to bypass the operator on campus and provide faster more effective service. Recently the university added on a new bay and offices and expanded the classroom in the spring of 2002.

#268 Chi Omega Sorority

This building was constructed in 1965. The building is not owned by New Mexico State University. (HD)

OFS Central Heating Plant

This building was constructed in 1966 at a cost of about \$775,000. The university felt that they would save \$24,000/year by putting in the new plant. At the time a round up article was printed in February of 1965 construction on the plant was slated to begin along with other building projects in July of 1965. The General contractor was Robert McKee of El Paso and the funding for the plant come from what NMSU received from a higher education bond issue that passed in November 1964. It was added to in 1976. Because this building was originally constructed about the same time as Walden Hall, the original part of the plant's exterior looks very similar to the math building's exterior design.

Greek Complex

Home to Sigma Alpha Epsilon, Pi Kappa Alpha, Kappa Sigma fraternities. The sororities of the Greek Complex are Pi Beta Phi and Alpha Xi Delta. The fraternity Lambda Chi Alpha is looking to move into the 800 block this summer. Buildings 271, 272, 273, & 274 were the original four buildings and were built in 1965. By September of 1965, construction had begun on the buildings whose plans had been drawn up by Rowland Associates of Roswell. The original four buildings were leased to Lambda Chi Alpha, Phi Kappa Tau, Sigma Alpha Epsilon, and Alpha Kappa Lambda and the cost of these buildings was approximately \$120,000 for the four 30-man buildings. The newer buildings were constructed in 1990.

Garcia Hall

Garcia Hall, building number 275, was constructed in 1968. (HD) This building was completely renovated in 2000. They removed parts of the north side of the buildings brick work to expose the dorm rooms that had been previously been covered from view from University Ave. The 1960's furniture was replaced with new beds, desks, and new dressers. Also each room got a fresh coat of paint, and the old door locks were replaced with electronic card-reader locks.

Fabian Garcia

Biographical Outline

- 1871, Jan 20** Born in Chihuahua, Mexico
1873 Brought to the U.S. by his Grandmother, Doña Jacoba
1875 Moved to the Mesilla Valley
1889 Became a U.S. citizen
1890 Entered the new agriculture college in Mesilla Park
1894 Graduated in the first class of the New Mexico College
of Agriculture
1894-1906 Assistant in Agriculture, N.M.C.A & M.A.
1899-1900 Special graduate work, Cornell University
1906 M.S.A. from the New Mexico College of Agriculture and Mechanical Arts
1906-1945 Professor of Horticulture
1906-1913 Horticulturalist at the Agricultural Experiment Station
1913-1945 Director of the Agricultural Experiment Station
1927, June Honorary Doctor in Agriculture, NMSU
1943, May 3 Honorary Doctor of Science, University of New Mexico,
Albuquerque
1941-1947 Member of Selective Service State Board of Appeals
1945, Feb. Hospitalized with Parkinson's Disease
1948, Aug. 6 Died at McBride's Hospital, Las Cruces, NM

Walden Hall

Walden Hall was constructed in 1966 and named for Earl Walden who was a professor, department head, and 1st dean of the Graduate School. This building was constructed where the radio station KNMA building used to be, south of Foster Hall and west of Baldwin Hall. The new math building was to be \$625,000 building and \$209,750 had been received for the building from National Science Foundation grant.

Earl Walden

Earl Walden was the first Dean of the Graduate School, and a professor and department head of the Mathematics Department who served for 24 years at New Mexico State University. (NMSU Buildings and Streets)

Southeast corner of Branson Hall that shows the original building with the attached façade.

South side of Branson Hall between the original building and the grill like façade attached to it.

The following are four Dedication plaques located in the main lobby of Branson Hall.

The original dedication plaques for Branson Hall. The plaque the left is the bottom plaque and it lists those people who were involved in the construction of the library. The plaque on the right is the second from the bottom plaque, and is the plaque dedicating the library to former President John Branson.

3rd plaque from the bottom, this plaque identifies those associated with an addition to Branson Hall that was completed in 1966.

4th plaque from the bottom, this place identifies those associated with another addition to Branson Hall that was completed in 1974.

Quick Bits . . .

The Branson Renovation Committee has been hard at work trying to make the best use of the resources available to renovate Branson Hall. The committee has been striving to meet the requirements of the Americans With Disabilities Act, fire, and safety codes. We have been challenged by low ceilings, poor heating and ventilation, and electrical systems that resemble a plate of pasta. Nonetheless, the Committee is persevering and is nearing completion of a plan. Stayed tuned for more details.

From "Quick Bits..." found in the New Mexico State University Library Newsletter, Page 10, Vol. 8, Number 2, Summer 1993.

Branson Library Renovation Design Approved

*Charles Townley
Dean of the University Library
e-mail: ctownley@lib.nmsu.edu*

The Branson Hall Library Renovation Committee has approved a design for the renovation of Branson Hall Library. This plan focuses on renovating user and staff space to reflect the changing needs of the Branson Hall Library facility.

In the public areas, renovation will focus on meeting fire safety and ADA requirements as well as creating a renovated area for book stacks and users. Six hundred seats will be available, which is roughly the same number of seats available now. Microcomputer access will be available. The general collections which will be housed on the third and fourth floors include business, the sciences, technology, agriculture and home economics, medicine, and bibliography.

A major increase in space will be provided for several unique services. Government Documents will be moved to the second floor to facilitate growing connections with other information services. University Archives and Rio Grande Historical Collections will be housed in the east part of the third and fourth floors of the building. A new reading room and improved workspace will be provided. Special Collections will obtain a separate reading room and an increased area for its collection. Collection Management and Technical Services staff will occupy totally refurbished quarters. At this time, funds are not available to renovate the existing Reference and Current Periodicals Reading Room.

It is expected that construction will begin sometime in March 1994. Project architects are ASA Architects of Las Cruces.

For additional information, please contact Cheryl Wilson, Chair of the Branson Hall Renovation Committee. ♦

From "Branson Library Renovation Design Approved" found in the New Mexico State University Library Newsletter, Page 8, Vol. 8, Number 3, Fall 1993.

Everything old is new again . . .

Branson Hall Renovation to Begin This Spring

Cheryl Wilson
Special Collections Librarian
E-mail: chwilson@lib.nmsu.edu

Renovation planning for Branson Hall is underway with construction expected to begin late March or early April 1994. The project is expected to be completed by July 1995.

The Branson Renovation Committee has been working with project architect Ted Shelton of Alley Mendez Shelton Architects, Inc. since January 1993. Health and safety issues, functional staff work areas, a growing book collection, and student study areas were considered as the architectural plans were developed. Branson Library houses the agriculture, business, science, and technology collections as well as the University Archives and Special Collections. The Technical Services and Collection Management departments and the Government Documents unit also are located in Branson Hall.

To address health and safety issues, new fire walls and "areas of refuge" will be added adja-

cent to the lobby atrium. Staff work areas will be remodeled including new electrical and voice/video/data wiring. The book collection will be housed on the third and fourth floors west with study areas scattered throughout. All of the book stacks are being moved to accommodate 36-inch-wide aisles.

The project is divided into three phases, with each phase lasting approximately six months. The first phase will include work on the second floor west and third floor east. Both areas are currently vacant of materials and staff. Six temporary library staff members are moving book stacks on both floors for the units and collections which will be relocated when the first phase is completed. During this phase the library staff expects some interruption of service when access to the upper floors is limited. Any time access is limited, circulation staff will retrieve materials for library users. Persons wanting to use federal documents may be asked to use either the staff elevator or the outside stairwell on the east side of the building.

During the second phase of the project, the Technical Services and Special Collections staff will relocate to second floor west and the Archives staff will move to the third floor east. Construction work will be located in the lobby and on the first and second floors east. The elevators will be upgraded during this phase. Entrance to the library will be through the north-east door in the periodicals room while this phase is in progress. It is expected that library users will have access to the Branson periodicals and reference collections but will have to request circulating materials at the Circulation Desk. There may

Aging and overcrowded Branson Hall is due for the first phase of its facelift this spring. The project, divided into three phases, is expected to be completed by July 1995. (Photos by Cheryl Wilson)

also be brief periods of time when Branson will be closed to the public; however, materials could then be requested at the Circulation Desk in New Library. Special Collections and Archives materials may not be available for public use during this phase.

The third phase of the project will complete the renovation of the second floor west and the fourth floor east. Government Documents will move to the second floor west where the collection will remain when the project is completed. The last move will be the Archives staff to the fourth floor east.

Noise, dust, and inconvenience can be expected during the project. However, the Branson Renovation Committee will continue to update faculty, staff, and students about any changes affecting library service during the renovation. Special signs will be posted in the building and memos will be distributed to teaching faculty. For more information, please call Cheryl Wilson at 646-3238. ♦

Please Note!

The Rio Grande Historical Collections/University Archives is moving up. Renovation plans for Branson Hall will relocate the RGHC on the third floor, and eventually the fourth floor, of the building's east wing. In order to prepare collections' approximate 10,300 cubic feet of unique holdings for this move, the RGHC must reduce its researcher services and hours of operation during the renovation. Hours for reduced service are now Monday through Friday from 1 - 4:30 p.m. To make the best use of their time and staff time, researchers are encouraged to make appointments by calling 646-4727.

From "Everything old is new again...Branson Hall Renovation to Begin This Spring" found in the New Mexico State University Library Newsletter, Pages 1-2, Vol. 9, Number 1, Spring 1994.

Branson Renovation Nears Completion

Curt Hernandez
Library Development

The renovation project at Branson Hall is approximately four months ahead of schedule and could mean that the entire project could be completed during the spring semester.

The first phase of the project was completed in late November. The work accomplished during this phase included firewalls being added to the second and third floors, increasing the size of the various floors' balconies, the addition of voice and data lines as well as work on the first and second floors' east sections.

The second phase of the project includes completing work on the second floor which will house codes and standards, and finishing fourth floor east where the Archives search room and office will be located. This phase will also include the completion of the lobby with new lighting, carpet and refurbished furniture.

Some Library departments will be moving to different areas at the completion of the project. Government Documents will be moving to the west side of the second floor while Collection Management will move into second east. Other departmental moves include the Archive stacks to third east, and Technical Services to first east.

"The Branson renovation project is addressing health and safety issues, providing functional staff work areas and supplying students and faculty with pleasant study areas," said Special Collections Librarian Cheryl Wilson.

Wilson also said that the Frenger street entrance will be open as soon as the lobby area construction is complete. ☺

From "Branson Renovation Nears Completion" found in Connections & Collections (New Mexico State University Library Newsletter), Page 1, Vol. 10, Number 1, Spring 1995.

U N I V E R S I T Y L I B R A R Y

DATE: January 8, 1986
TO: Library Faculty and Professional Staff
FROM: Lowell Duhrsen, Acting Director 
SUBJECT: Administrative Happenings

There has been a lot of hustle and bustle since we returned from the Holidays but things should settle down to normal by the time school gets going next week. The stacks are being put up on the 4th and 3rd floors but the shifting operation will extend into the Spring semester. This will no doubt inconvenience our patrons to some extent but in the long run I am certain they can see it will be to their benefit.

New index table are being assembled in the Physical Plant and will start being brought over immediately. The physical arrangement of the Reference area will begin at that point planning for the installation of the on-line catalog sometime this spring (hopefully).

There will be a new staff member joining us for 30 days to assist Cathy Chegin with the Reserve operation. Her name is Wilma M. Krauss. She is on occasional status.

We are beginning to put together job/project descriptions for our library faculty members. We are starting with our newest hires or those assigned to new duties. We will move through the entire faculty as the year progresses.

As you already know, Dr. Dyke has been reassigned to the working title of University Bibliographer. He is still in the process of clearing his office but will physically relocate to Room 417 on or before January 20th. His extension is 5781.

Both the Support Staff Council and the staff association are being formed and should be operational within a short period of time. You have already received a memo concerning the Professional Library Travel Committee.

Memo from "Administrative happenings / New Mexico State University Library", January 8, 1986 that relays information about Branson Hall moving shelving, putting in new "index table[s]" made by "the Physical Plant", and arranging the Reference area once the previous two things are completed to accommodate "installation of the on-line catalog."

MEMORANDUM

DATE: September 10, 1986
TO: Library Faculty, Professional Staff & Classified Staff
FROM: Lowell Duhrsen, Editor 
SUBJECT: In, Out, and About the Library

Dean Davis has made several visits to the Library since his appointment as Library Dean. He is still planning to arrive on campus as soon as possible, but no later than January 1, 1987. He has approved the following projects that were mostly begun prior to his appointment:

The remodeling of the Circulation area to accommodate the OLE' system and recapture some office and work space lost to the computer room. This project is being bid out and probably will begin in October. This will cause great disruption, but like El Paseo, "will be worth it in the long run". A small room will be added to the Reference conference room for data base searching, and the old Serials Service Desk will be removed. There will be a separate office for the circulation department head, and a small room that will accommodate separate copying facilities for faculty when this can be funded.

Many of the staff has had input into the refurbishing of the areas of the Library that have experienced computer "infiltration" over the past 10 years. We have always simply "made due" with whatever furniture and equipment that was at hand and the breaking point was reached with OLE'. How soon we can expect the first installation is unknown, but probably no sooner than spring.

Memo from "In, out, and about the library / New Mexico State University Library", September 10, 1986 that relays information about Branson Hall remodeling the circulation area, the creation of the "computer room", other room/furniture additions, and remodeling do to "computer 'Infiltration'."

ITEM

Goodman's from Albuquerque will be installing the new computer furniture in January. I hesitate to firmly state a date since there is always slippage. This will be disruptive but probably positive disruption if the end result is as pleasant as anticipated.

ITEM

The Circulation project must be rebid as the low bidder has been disqualified. When this project actually gets under way is still not known.

ITEM

Remodeling and refurbishing of the Administrative Offices will be part of summer renovation but Dr. Davis has been assured that it will be done.

ITEM

Dr. Conroy has reported to me that the campus asbestos study the State was conducting has turned up no conclusive evidence that there is an asbestos problem in the Library. However, the decision has been made to encapsulate various areas of the Library anyway and this will proceed in stages during the spring semester. The lobby area will hopefully be done during the period between Christmas and New Years. It will be necessary to restrict access to those areas being treated, but at this point I have no idea how this will be handled.

Memo from "In, out, and about the library / New Mexico State University Library", December 4, 1986 that relays information about Branson Hall installing computer furniture, remodeling the circulation area, and "encapsulate[ing] various areas of the Library anyway" to protect against asbestos. There was not evidence of an asbestos problem, but the library decided to be sure there wasn't a problem.

Building News

The Administrative Offices have joined with the rest of the Deans' offices in remaining open during the noon hour.

Please take an opportunity to greet and compliment the two building custodians when you get a chance. Richard Torrez is assigned the first two floors and Raymond Monterola takes care of 3rd and 4th. All indications are that the day schedules are making a significant improvement in the condition of the building. Administration continues to push for a third person for at least one shift sometime during the weekend. We all know what a mess the place is by Monday.

The long-delayed Circulation renovation project appears back on track and should commence within the next several weeks. The low bid was made by Multi-Services of Las Cruces. As the project could not be done with the funds made available by the "summer renovation" dollars available by PPD, the Library will have to come up with approximately \$4,500.00 to complete the project in the manner we would like. Holly Reynolds will be working with Lowell Duhrsen in attempting to create some sense of order during this hopefully short duration project. No doubt it will be somewhat of a mess to maintain operations during this period.

The encapsulation project is going much faster than expected. It is now half completed with 2nd and 1st floors yet to go. The Library is attempting to convince the PPD that the project can be completed over a long weekend period which would mean minimal disruption to those areas where staff are housed.

The computer furniture project is continuing on its historical course--disappointing. Delays are yet anticipated before final shipment of the remaining pieces arrive. The electrical work to complete the project is more involved than expected--due to our PPD's rather cumbersome procedure in bidding out work that they cannot handle expeditiously. However, what has been completed, or largely completed, is very nice and has helped the work environment. Sorry, this project has been star-crossed from the beginning.

The University is also planning on refurbishing the front of the building in anticipation of the beginning of the international mall extension project that will begin in the fall with the closing of Frenger. New paint, benches, planters, and yes, two signs that say "Library" will be applied and installed. There has been no date set for the start of this project.

Deadlines: It is hoped that substantial progress can be made toward activating the old circulation project by fall. The item record project is progressing, but slower than anticipated. It may have to be extended beyond its previously expected completion of late summer.

Memorial: The Faculty Senate has passed a memorial recommending that a new library structure be made a top priority of the University. You will recall that draft of this memorial was read at the retreat. A copy of the memorial can be obtained in the Administrative Offices.

From "In, out, and about the library / New Mexico State University Library", February 18, 1987.

The refurbishing of the front entrance is certainly unique. With the imminent closing of Frenger street, we are hopeful that this all ties in with plans for the mall that will replace the street.

From "In, out, and about the library / New Mexico State University Library", August, 1987.

The campus architect is working with the Library Administration on several projects that were identified in the budget requests and approved for this fiscal year: The darkroom project for Archives in the present automation storage room; the front entrance will be remodeled to accommodate the handicapped and the detection system; the automation office will be expanded into the Circulation Department a few feet. When these projects will actually be started is not determined at this point.

From a memo from "In, out, and about the library / New Mexico State University Library", September, 1987.

FACILITIES

Support for the library facility has developed from all sectors of the campus and the community with editorials in support of the expansion, and particularly a new facility, in the Las Cruces Sun News and the Roundup. The NMSU students are mounting a letter writing campaign to the legislature. Cheryl Wilson and Dean Davis were instrumental in the production of a Library brochure which has been sent to 30,000 parents, alumni, government officials and other targeted individuals. The short session of the legislature will meet for 30 days starting in mid-January to consider the recommendation of the CHE for this building project.

From "In, out, and about the library / New Mexico State University Library", December, 1987.

PROJECTS

The first phase of the physical relocation to accommodate the reorganization plan is in process and should be completed in several days. After a period of adjustment, the final plans will be formulated sometime in the Spring with completion, hopefully, by Fall. There are six projects identified for which the Library is hoping to obtain funds, as the money allocated will not be sufficient to complete the projects. These projects are:

- : The Administrative Offices. This project is proceeding as funds for this project were identified and funded early on.
- : Special Collections. This project will also proceed and should be in progress within the next several weeks. This involves the already completed task of redoing the old CMC and relocating the new CMC to the sorting room on the 2nd floor. A reception area for Special Collections will be created where the maps formerly were located. Theses and dissertations have already been moved to the previous CMC location.
- : The Visually Handicapped Facility will be relocated to a group study facility on the 3rd floor. This will virtually eliminate all group study areas for the time being as one is now being used to store the card catalog cabinets until they can be disposed. The old Visually Handicapped area will become part of the Administrative Offices as will Room 345. Space for group instruction will not be possible until other space can be identified when the plan for Information Services are finalized.
- : Information Services is in the process of brainstorming on how best to provide services in the space created by the elimination of the card catalog, the potential space to be vacated by the old Serials Department; and the potential removal of a portion of the compact stacks.
- : The Darkroom Facility identified in last year's budget has yet to be completed although plans have been developed.

From "In, out, and about the library / New Mexico State University Library", January 1988.

Major changes have been made in the plans for the physical plant. The cost of moving the Administrative Offices to the third floor ended up prohibitive due to the cost of upgrading the power and ventilation for that area. The University Administration was not forthcoming with the funds for that project plus the other projects that we are presently working on. As of this date, the projects approved are:

- : keeping the Administrative Office in its present location but with some major upgrading of that space, including expanding the area to include a portion of the area that now houses the shelf list and the bibliographic area.
- : Special Collections project is in progress and will proceed full steam once adequate power is brought into the area.
- : Information Services and Collection Management will share the space in the former Serials Department. A large portion of the movable stacks will be removed to accommodate the expansion of the Reference Department into this area. The remaining movable stacks in the Circulation area will be utilized to house shelved periodicals/serials.

From "In, out, and about the library / New Mexico State University Library", April 1988.

June, as always, was a quiet month with many projects either on hold or progressing more slowly because of vacations, etc. The several renovation projects that we started in the spring and early summer are slowly taking shape.

- : Special Collections was carpeted and once the final touches are made to walls, etc. the final plans for occupation of that space can proceed.
- : The Administrative Offices were moved to "temporary" quarters on the 2nd floor in the old CMC. Completion of this area is scheduled by Labor Day. The area was made presentable under the direction of Cheryl Wilson and the move was accomplished most efficiently by Bette Fancher and Claudia Billings' fine staff of shelving personnel. This group has been called on repeatedly during the summer and this is much appreciated.
- : Plans for the Information Services/Collection Management area should be finalized and submitted by Purchasing for bids very shortly. Hopefully, some aspects of this project can be completed by the time school starts, but completion of the project will obviously be sometime during the fall semester.
- : The Technical Services area will be spruced up with painting sometime following the completion of the Administrative area. Once that is completed, we will determine what else can be done from the current budget to improve the working conditions and atmosphere in that area.

From "In, out, and about the library / New Mexico State University Library", June 1988.

BACK TO THE DRAWING BOARD

The Associate Dean remained perplexed about the plans to locate the 3M detection system at the lobby entrances. The distance was simply too far from the nearest staff area once the doorguards are released in December.

After studying and remembering how other libraries have handled a similar situation, the following plans are now in progress:

- : The lobby will be enclosed with rails (hopefully the same type of attractive oak rails now in the Circulation Department work area) that will channel everyone through an area that is in close proximity to the Circulation Desk--approximately the area where the escort service desk is located.
- : The grand staircase will be removed.
 - : The removal of this relatively useless staircase will free up a large space for a potential lounge area or other future uses.
- : The same detection system with a single entrance and exit will be installed sometime between the end of the fall semester and the beginning of the spring semester.
- : The present entrance and exit turnstiles will be removed and, probably, the "playpen" area that separates them.
 - : This will greatly facilitate access to the building by the handicapped although the PPD is contemplating a future installation of electronic doors which would make it easier not only for the handicapped, but for all patrons with armloads of books, etc.
- : Portions of this work could begin almost immediately so that the messy part can be completed by the beginning of the fall semester in several weeks and while we are at a low use period.

The Information Services/Collection Management project has been bid and Lester Construction (the same firm doing the Administrative Offices) will be doing the project. We will attempt to coordinate the work with the upcoming activities involved with the fall semester. Construction should begin by September 1. Completion of the Administration area construction should be in approximately 3 weeks although the furnishings will be delayed. When this area is completed we can begin to plan for "sprucing" up the Technical Services area with new paint, work station panels, etc.

From "In, out, and about the library / New Mexico State University Library", July 1988.

INDEX: The comprehensive index to the ARL/OMB Spec Kits has been placed in the Staff Reference Point.

ROOF: The Library has received information that would indicate that there is a strong possibility that the entire Library roof will be repaired/replaced. The cost is in excess of \$100,000 and should be bid in January, 1989. Our thanks to Vice President Conroy for investigating this on-going problem, including a visit, and using the influence of his office to intercede on our behalf. There is always a long list of projects on campus that are lined up for attention. How this work will affect our operations on the 4th floor is unknown at this time.

DETECTION SYSTEM: It is possible that during the last part of this month the railing system, that will channel people through the upcoming detection gates, will be installed. It is not anticipated that this will cause any significant disruption although the public, who are not aware of the impending system, will most likely be confused as to why we are installing these rails.

THE NEWSPAPERS will be moved this month from the 2nd floor balcony to the CPRR and furniture will be relocated from areas in the Library to the Lobby.

OTHER PROJECTS:

- : Hopefully the final aspect of the Information Services/Collection Management project can be completed shortly. There is a long list of major and minor items that must be attended to before we can conclude this project.
- : The construction of the Dark Room on the 4th floor (former men's room) will be bid on November 8.
- : An extension of the Systems Office is being planned in space now occupied by Circulation. This project has been in the planning stage for over a year. While not a major expansion, it should provide some breathing room for that staff.

From "In, out, and about the library / New Mexico State University Library", October 1988.

PROJECTS UNFINISHED: Unfortunately, there appears to be a problem of some kind between the contractor and the PPD on the final "touches" of the renovation. We have been promised that this will be resolved and such items as replacement tile, missing doors and carpets, etc., will appear--at what point who can say. The new Information Desk is under construction.

The installation of the detection system in the lobby appears to be back on schedule and could indeed be in service prior to the Spring semester. The necessary railings are scheduled for installation for the week of December 17 and the detection system itself for the week of January 2. The turnstile operation will be staffed by Circulation between the period of December 16, the last day for our present doorguards, and the installation of the system.

From "In, out, and about the library / New Mexico State University Library", November 1988.

IN, OUT, AND ABOUT THE LIBRARY
February, 1989

THE ROOF: Beginning the week of March 13 the repair of the roof will begin. It will take several months to complete the project. There will be a considerable amount of noise and general commotion during various stages of this project as you can imagine. The amount of activity should be self-evident to our clientele with the cranes, trucks, cement mixers, etc., parked at the curb. The work is guaranteed for 15 years which means we can probably at least count on getting through the coming summer.

The last major project of the 1989 Renovation Project is underway with the installation of the doors in both Technical Services and Collection Management/Reference. There are still a few odds and ends that are most aesthetic and we will attempt to have them attended to. Often times it is these last few items that seem to never get done. Furniture, chairs, etc., are still not delivered in most areas.

From "In, out, and about the library / New Mexico State University Library", January 1989.

While it would not be inappropriate to have a celebration on the occasion of the completion of the roofing project, it may be more appropriate to wait until the rainy season. However, anticipating that if the roof still does leak that it will leak in other places, the plastic that had hung for many years has been removed. However, it is close at hand should July bring any surprises.

From "In, out, and about the library / New Mexico State University Library", April 1989.

PPD: The frustrations with our refurbishing projects are felt throughout the Library. We have yet to complete a single project started this summer. While not unusual, it is still maddening that so little can be done to hasten these projects through the required channels. But, congratulations to Janet Faulhaber for the hot water after so many decades.

From "Library Update / New Mexico State University Library", October 1989.

EVENT

On Monday, November 11, 1991, the staff enjoyed an extended lunch hour due to a four hour power outage caused by the attempt to "turn on" the power in the New Library. The staff should be congratulated on the calm and efficient manner in which they reacted. The police, fire department and physical plant were all summoned and the building was evacuated quickly and efficiently. It was immediately obvious, however, that the Library suffers from a lack of flashlights and the emergency lighting which was largely nonexistent or nonfunctioning. Both situations will be addressed. As this was an excellent and extended opportunity to review our emergency procedures. The Safety Committee has been asked to also review the situation and make recommendations.

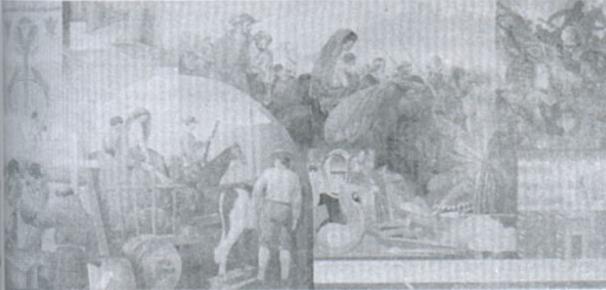

From "Library Update / New Mexico State University Library", November 11, 1991.

Restored Tom Lea Murals Dedicated in Branson October 25th

by Charles Townley, Dean, University Library, ctownley@lib.nmsu.edu

Two restored murals by Tom Lea will be dedicated in the Branson Hall Library during Homecoming at 10:30 a.m. on Friday, October 25, 1996. Tom Lea is a distinguished El Paso artist and author. These murals were originally painted in 1934 for the Young Hall Library at New Mexico State University. They were removed in 1951 when the Branson Hall Library was completed and hung for a time in Milton Hall. They were in storage for many years awaiting repair and renovation.

At a recent workshop on the restoration, Mr. Lea provided some background information on the murals. In 1934, Gustave Bauman contacted Tom Lea regarding the possibility of a WPA contract. The WPA administrator hired Lea to paint two murals for "the A and M library in Mesilla". He received \$40.00 a week for his work and the paintings took three months to complete. Mr. Lea brought the paintings to New Mexico State University "... in an old Dodge sedan with the windows broken out of it." The paintings themselves were rolled around a cardboard tube originally used to roll carpet. They were framed at the University and hung on either side of the circulation desk on the second floor of Young Hall.

Tom Lea painted "Conquistadors" first. It presents several views of the first hundred years of New Mexico history, emphasizing the colonizing efforts of DeVargas and Oñate. The Conquest, the Pueblo revolt of 1680, and the Reconquest are all depicted. The second painting is "Old Mesilla". This mural depicts historical events in and around the Mesilla area in the 19th Century such as the Gadsden Purchase and agricultural fields.

Tom Lea described some of the techniques that he used in the painting. He began with number 12 cotton duck canvas which he purchased in Santa Fe and primed and sized himself. The canvas was wrapped around oversized plywood sheets which had been previously primed and finished. Much of the color came from pigments prepared by Raymond Johnson, another artist in Santa Fe, who was willing to provide paints to Lea on credit. To achieve the vibrant colors of the paintings, he used the paint straight out of the tube with no medium. Lea says that his brush work emulates Cézanne's method of parallel brush strokes. John Norton, Lea's master at the Art Institute of Chicago, did not believe in overpainting on murals. Therefore, Lea painted *a la prima*, avoiding overpainting to achieve a flat surface.

The paintings were restored with a grant from the Stockman Family Foundation. Restoration work was undertaken by Randall Ash of Denver, Colorado. New frames for the works were prepared by Matt Lynch. Frank Rocha and his crew at the Physical Plant Dept. assisted with the hanging. The work was coordinated by Charles Lovell and Rosemary McLoughlin from the NMSU Art Gallery. We hope that many people will come and join us in the rededication of these two important works during Homecoming festivities at 10:30 a.m. on Friday, October 25, 1996 in the Branson Hall Library.

From "Restored Tom Lea Murals Dedicated in Branson October 25th", found in Citations / New Mexico State University Library, page 9, Vol. 11, No. 3, October 1996.

Branson Opens New Staff Lounge

by Mike Mitchell

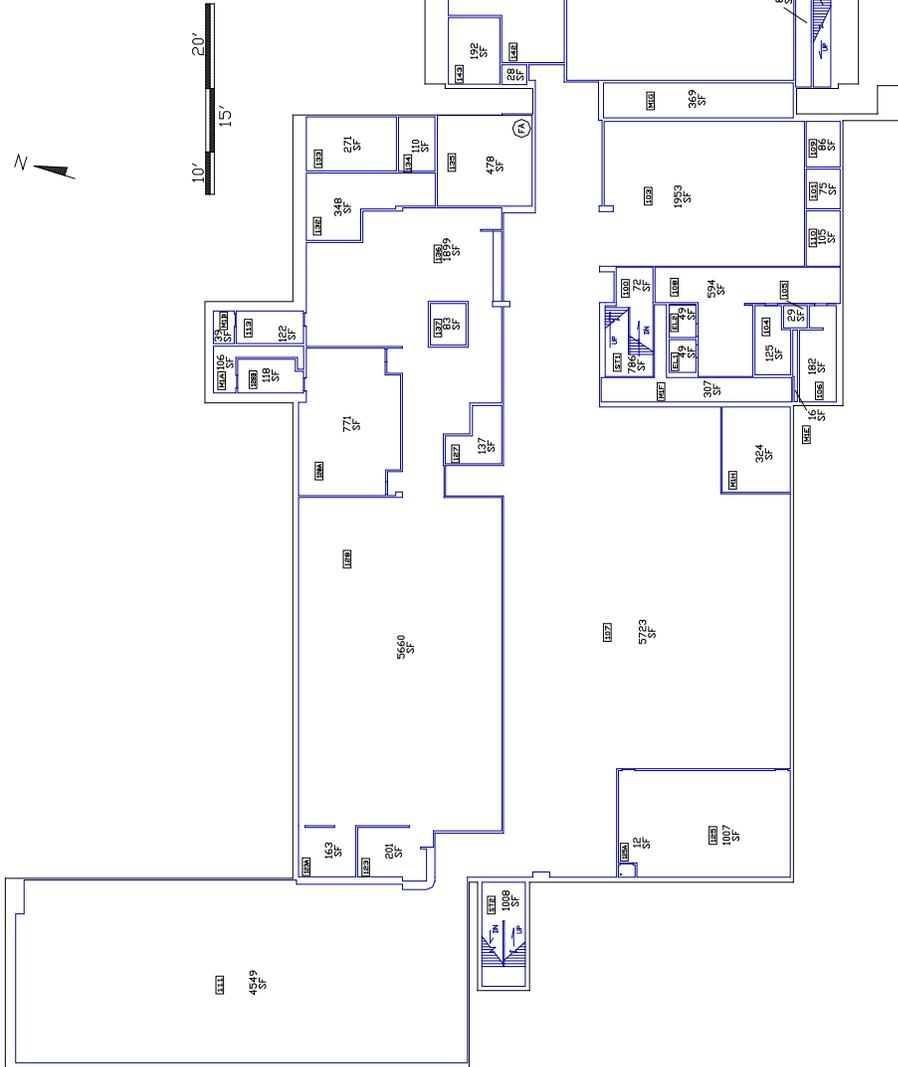

Branson Hall's new airy and spacious staff lounge opened in mid-November. Members of the library's Social Activities Committee—Mila Smith, Cheryl Wilson, Lisa Valdivia, Barbara Hart, Fatemeh Zafaremi, and Molly Molloy—did a thorough and eye-pleasing job of making the converted space on the first floor into a comfortable and homey lounge. In addition to new walls and doors, new carpeting and a small kitchen were added to convert this space. At present the furnishings are from the original lounge on the fourth floor, but the committee hopes to add new coffee tables when funds become available. Two events were held at the new Branson Lounge in December: the Student Appreciation Party and the Staff Christmas Party.

From "Branson Opens New Staff Lounge", found in Citations / New Mexico State University Library, page 11, Vol. 12, No. 1, January 1997.

Branson Hall

Originally the University made its home in Young Hall, building #32, but as the library grew the need for a new library building grew too. Discussion on the construction of Branson Library began July 15, 1950 at the Board of Regents meeting. There, it was reported that the building was number one on the Board's list of building projects. During that meetings lunch break possible sites for the building were inspected. The Board also employed Schaefer and Merrell Architects to draw the plans for the new library building under the conditions stipulated by President Branson. (BOR, p. 639-640)

The following September, the Board met and it was reported that the new library should be located to the southeast of Young Hall, being sure to leave enough space between the building to avoid any insurance problems and closing a circular part of a road that used to go through the construction site. (BOR, p. 640)

In January of 1951 it was reported to the Board of Regents that the plans and specifications for the building would be finished by the second week of February, and that advertising for the bids should be put off until the plans were finished. (BOR, p. 646) The final plans and specifications were finished by April 4, 1951, and advertisements were published. On April 24, 1951 the bids for construction were opened in the Office of State Purchasing. (BOR, p. 653) Branson Library's design featured marble wainscoting similar to Hadley Hall's design. Omitting the marble would have reduced the cost by \$13,299.00, but the Board opted to keep the marble in the plans. C. H. Leavell and Company was hired to be the general contractor for the building on June 5, 1951. (BOR, p. 660)

On October 13, 1952, the Board authorized President Branson to have the plans changed, eliminating the installation of a generator for hot water and expensive kitchen equipment in the library. (BOR, p. 684)

By December 16, 1952 work on Branson Hall had been completed by C. H. Leavell and Company. The contractor requested payment for the construction on the library building, but the Board refused to pay until Hadley Hall had also been completed because that was terms of the contract. (BOR, p. 686) It was reported to the Board at that December 16th meeting, that White Sands officials wish to rent the third floor for a data reduction program. Their plans for moving into the third floor were to follow the existing plans and make any additions they find necessary. President Branson was authorized to negotiate with the people from White Sands. An additional \$250,000 in bonds was issued to fund the completion of the library. (BOR, p. 687)

At the April 14, 1953, Board of Regents meeting, several decisions were made regarding Hadley Hall.

1. A statement of total cost of the library and administration buildings.
2. Have to pay sales tax on the construction.
3. A program of dedication was to be included in Homecoming 1953's activities.
4. Approval of the sale of bonds to finish the building.
5. \$50,000 of U.S. Treasury Bonds transferred from plant to operating funds in exchange for \$50,000 in cash to pay the contractor for their work. (BOR, p. 690)

At the May 12, 1953 Board of Regents meeting, it was reported that Mr. R.E. Merrell from Schaefer and Merrell Architects accepted the responsibility of seeing to it that the air conditioning system in the new library works.

Originally the third and fourth floors of the library were not finished. It was reported at the June 9, 1953 Board of Regents meeting, that finishing those two floors was third on the Board's list of priorities. (BOR, p. 701) Branson Library underwent construction again to complete the third and fourth floors. Plans and specifications were prepared by Wolgamood and Millington Architects, and the bids for the third floor were opened June 23, 1953. That same day President Branson spoke with Mr. C. H. Leavell about construction defects, and he asked the company to fix the noise problem in the air conditioning system. (BOR, p. 706)

In October of 1953, bids were advertised to finish the fourth floor of the library for use by the Physical Science Laboratory with the elevator specified in the original plans for the building was included in the call for bids as an alternate item. (BOR, p. 711)

On November 17, 1953, a motion was made to name the new library Branson Hall in honor of J. W. Branson. Later that day, the building was dedicated as Branson Hall. (BOR, p. 711 & 713) The Board of Regents went on a tour of the new library on November 22, 1954. (BOR, p. 745) In January of 1955, a name plaque with Branson Hall on it was finally placed on the building. (BOR, p. 748)

In March of 1954, the plans and specifications for the completion of the upper floor in the library were changed based on suggestions made by members of the Engineering School Staff. It was not possible to complete the necessary architectural plans and specifications according to the suggestions made in time to get them to prospective bidders by March 17, 1954. On March 31, 1954 at 2:00 p.m. bids were opened for the design changes to the fourth floor of the library. (BOR, p. 719) In May of 1954, it was reported to the Board of Regents that it would cost \$3,000 to sound insulate the air condition in the library. The cost was split into thirds between C.H. Leavell and Company, Scheafer and Merrell, and the University. (BOR, p. 732) The architect, Wolgamood and Millington, was authorized to proceed with the plans to finish the upper floors of Branson Hall, and it was recommended that \$75,000 be allocated from the building funds to pay for the completion at the April 4, 1955 Board of Regents meeting. (BOR, p. 751) Mr. Tatsch was hired as the general contractor to finish the library on January 11, 1957 at a cost of \$45,461. Left over money was left to the University President to take care of. (BOR, p.806)

On August 29, 1957, Dr. Reginald Fisher, Director of the Fine Arts and Extension at the Museum of New Mexico Art Gallery offered four paintings from Julius Rolshower collection to be hung in a locked area of the new floor of the library. (BOR, p. 822)

The west end of Branson Hall was added on to, and the original part of the building was covered with decorative blocks in 1965-1966. The architect was Loren Mastin, and the general contractor was Ponsford Brothers. Branson Hall was renovated again in 1974, adding to the west end of the building once more. The plans were done by Charles E. Nolan, Jr. and Associates, AIA. The general contractor was Wooten Construction Company.

Between 1987 and 1989 the library underwent renovation. The circulation area underwent changes to accommodate the use of computers for checking in and out books and other media. The grand staircase was removed from the lobby in 1988 and new security gates were installed. Where the staircase was there is now a sitting area. The roof was repaired or replaced in March of 1989 and was completed in April of 1989. Hot water was finally added to the building in 1989 as well.

In January of 1993, Ted Shelton of ASA Architects began working on plans for another renovation of Branson Hall for health and safety issues as well as for the creation of better spaces for staff to work, accommodating a continuously growing collection, and addressing student study areas. Work began in March or April of 1994 and was structured into three phases of construction. (NMSU Library Newsletter, Spring 1994)

The first phase, completed in November of 1994, was the addition of firewalls on the second and third floors, "increasing the size of the various floors' balconies, the addition of voice and data lines, and work on the first and second floors' east sections." (NMSU Library Newsletter, Spring 1995)

The second phase of construction included the completion of work on the second floor, finishing the east part of the fourth floor for University Archives, and completion of renovating "the lobby with new lighting, carpet, and refurbished furniture." (NMSU Library Newsletter, Spring 1995) The elevators were also upgraded during this phase. The third phase involved the completions of the renovation to the west part of the second floor and the east part of the fourth floor. This major renovation project was completed in the Summer of 1995. (NMSU Library Newsletter, Spring 1994)

John W. Branson

John William Branson brought considerable experience to the President's Office. He came to New Mexico A&M College in 1927 as head of the Mathematics Department and was appointed Dean of the College of Arts and Sciences in 1941. His Ph.D. was from the University of Chicago. (From the New Mexico State University web site

http://www.nmsu.edu/General/Past_presidents/branson.html)

He served as acting President from June to October 1938, from September 1941 to January 1946, and from April 8 to October 16, 1949. He became President of New Mexico State University on October 17, 1949 and served until August 14, 1955 when he retired. (NMSU Buildings and Streets)

Stucky Hall

This building was constructed in 1970. (HD)

H. Ralph Stucky

H. Ralph Stucky was the first director of the Water Resources Research Institute. His list of accomplishments include organizing and chairing the first New Mexico Conference from 1956 to 1971, and promoting federal legislation that established water resources research centers. New Mexico's WRRRI was the first of these centers and the Water Resources Research Act funded it. New Mexico Senator Clinton P Anderson and Representative Thomas C. Morris also supported this Act. Mr. Stucky was also a director of the National Universities Council on Water Research and he received a presidential commendation for national contributions. Mr. Stucky, a native of Montana, received his Ph.D. at the University of Minnesota. In 1954 he became a professor and head of the Department of Agricultural Economics and Agricultural Business at New Mexico State University. Mr. Stucky passed away March 9, 1999 at the age of 94. (Source: Aggie Whirl, Aggie Panorama, June 1999 edition, <http://www.nmsu.edu/~ucomm/Panorama/June99/whirl.html>) (Photo courtesy of University Archives. Mr. Stucky pictured on the Left.)

Pan American Center

This building was constructed in 1968. It has a capacity of 13,067 people. On October 11, 1987 a fire broke out on the roof of the building. The cause was propane torches used by the roofing contractor who was in the process of repairing the roof. The damage caused by the fire was cleaned up and repaired. The roof was 60% completed by September of 1987, and was slated to be finished in November of 1987. The total cost of the new roof was \$475,000. (BOR, p.2682)

Corbett Center

This building was constructed in 1968. The original plan for the building was much different from what you see today. The original location for the building was to be approximately where Educational Services building is today behind Garcia Hall. Also the original plan was only two stories but featured a planetarium, bowling lanes, billiard and table tennis, a bookstore, administrative offices, and room for games, hobbies, a dark room, etc.

The east side of the building has had a wing added on which houses game rooms, a computer lab, and offices for the Round-Up and KRUX, the student newspaper and radio station. This part of Corbett was constructed in 1979 at a cost of “approximately three million dollars.” (Yearbook, 1977)

The building was added on to again in 1996. The west side of the building has had the bookstore added onto it and a rotunda was added to the northwest corner of the building. The current roof has numerous air pockets and will be replaced in the next few years. Currently, Corbett Center contains the University Bookstore, conference facilities, a student cafeteria, student cafes, the Post Office, an auditorium, a game room, computer lab, Student Services, the Round Up offices, and student radio station KRUX.

President Roger B. Corbett

Roger B. Corbett was the Agricultural Advisor for the National Association of Food Chains when he accepted the Presidency of New Mexico A&M College. His B.S., M.S., and Ph.D. degrees were earned at Cornell University. Previous academic positions included Dean of the College of Agriculture at the University of Connecticut and Director of the University of Maryland's Agricultural Experiment Station. During his tenure, New Mexico A&M formally became New Mexico State University, both physical and academic growth accelerated; the graduate school was organized, and the first doctoral programs were initiated.

He was President from August 15, 1955 to August 1, 1970. (NMSU Buildings and Streets)

#286 Fraternity House

This building was constructed in 1966 at a cost of \$17,000. The fraternity was renting the building. (HD)

O'Donnell Hall

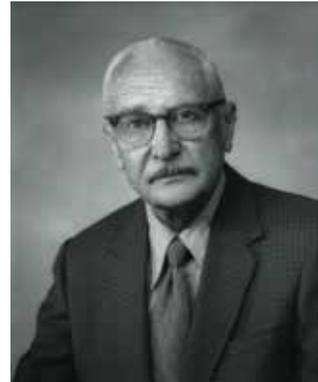

This building was constructed in 1968 for the College of Education. The project was authorized in 1966 and work was completed in 1968. The architect was Kruger, Lake, and Henderson Associated Architects and Engineers. The general contractor was Frank Tatsch General Contractor.

In 1977 the university had to save the building from “sinking”. The engineers who built O'Donnell Hall did not take into account that the construction site for the building was in an arroyo. Because of this the top floor of the front of the building that creates an overhang had to be reinforced. Today it is still not perfect. If you are in the classrooms of the third floor and drop a marble it will still roll to the east with some speed behind it.

On Sunday, December 12 1999, the building had a fire on the second floor that burned that floor and covered the rest of the building with soot. The damage caused by the fire displaced over 100 employees and 175 classes. The cost of renovation of this building to repair damage from the fire cost \$481,407, and the work was done by Wooten Construction Company. The College of Education was able to return to its home in May of 2000.

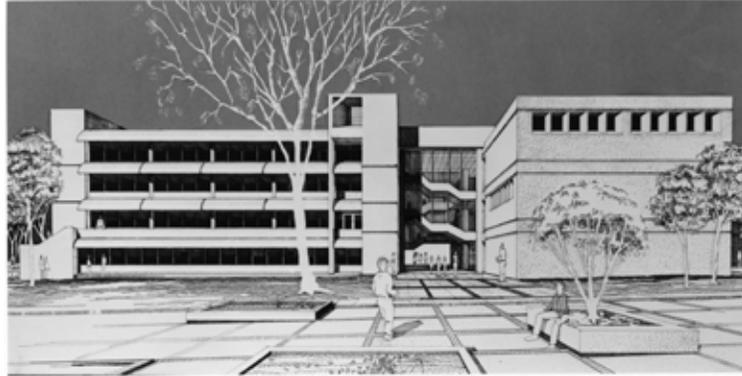

Dr. William B. O'Donnell

William B. O'Donnell was a former professor, dean of students, and dean of the College of Education. He was also Vice President of the University from 1959 to 1968.

Thomas & Brown Hall

This building was constructed in 1971 for electrical engineering. Construction was authorized in 1968, and the architect was Hartger and Harris Architects. The general contractor was Wooten Construction Company. It was dedicated February 25, 1972. There was confusion over the name of the building and so it was renamed from “Thomas Brown” to “Thomas and Brown” because the namesakes were two different people instead of a single person named “Thomas Brown”. Thomas and Brown’s western corner of its basement was the original location for the campus’s original central heating plant.

Tombaugh Observatories

These building were either constructed in 1971 or 1967. They were dedicated September 14, 1972. (HD)

Clyde W. Tombaugh

Clyde William Tombaugh was born in Illinois in 1906, grew up on a farm northwest of Burdett, Kansas, and was graduated from Burdett High School in 1925.

In 1926, at the age of 20, Tombaugh built his first telescope. Dissatisfied with the result, he determined to master optics, and built two more telescopes in the next two years, grinding his own lenses and mirrors, and further honing his skills.

Using these homemade telescopes, he made drawings of the planets Mars and Jupiter and sent them to the Lowell Observatory in Flagstaff, Arizona. The astronomers at Lowell were so impressed with the young amateur's powers of observation they invited him to work at the Observatory. Clyde Tombaugh stayed at the Lowell Observatory for the next 14 years. The young astronomer earned a permanent place in the history of science when he discovered the planet Pluto on February 18, 1930.

In 1932 he entered the University of Kansas where he earned his Bachelor of Science degree in 1936. He continued to work at Lowell Observatory during the summers and after graduation he returned to work at the Observatory full-time. In 1938, he received his master's degree from the University of Kansas.

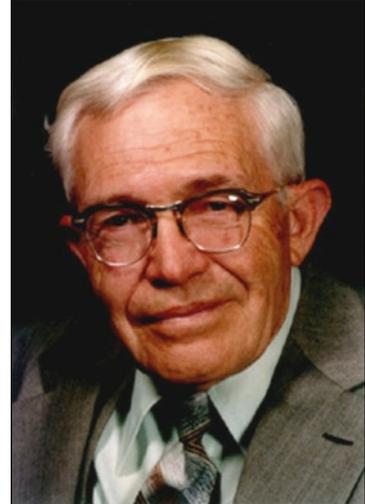

During his years at Lowell Observatory, Tombaugh discovered hundreds of new variable stars, hundreds of new asteroids and two comets. He found new star clusters, clusters of galaxies including one super cluster of galaxies. In all, he counted over 29,000 galaxies. Tombaugh remained at Lowell until he was called to service during World War II. The astronomer taught navigation to the U.S. Navy at Arizona State College in Flagstaff from 1943 to 1945.

After the war, Lowell Observatory was unable to rehire Tombaugh due to a funding shortfall so, in 1946, he returned to work for the military at the ballistics research laboratories of the White Sands Missile Range in Las Cruces, New Mexico, where he supervised the optical instrumentation used in testing new missiles.

In the course of this work, Tombaugh designed many new instruments, including a super camera called the IGOR (Intercept Ground Optical Recorder) which remained in use at White Sands for 30 years before it was finally improved upon.

After nine years at White Sands, Tombaugh left the missile range in 1955. He was awarded the medal of the Pioneers of White Sands Missile Range.

From 1955 until his retirement in 1973, Clyde Tombaugh was on the faculty at New Mexico State University in Las Cruces.

Educational Services Center

This building was constructed in 1978 at a cost of \$1,545,266. (HD)

#342 Memorial Stadium, including locker rooms, press box and concourses.

new mexico state university
football stadium

las cruces

From a portfolio book of work done by Boehning, Protz, & Associates, Architects and Engineers Albuquerque and Las Cruces. The portfolio book was used to introduce the architects to Don Dresp, the director of Thomas Branigan Memorial Library when they were considering an architectural firm to building that currently houses the public library. The portfolio book also lists the completion date and cost of the stadium as well as other NMSU related buildings they completed.

Photo of the stadium's construction in 1978. Photo courtesy of University Archives.

Photo of the north side of the locker rooms taken February 26, 1991.

Photo of the north side of the locker rooms taken July 11, 2004.

The following photos were taken in October of 2001.

West stands and press box

East stands.

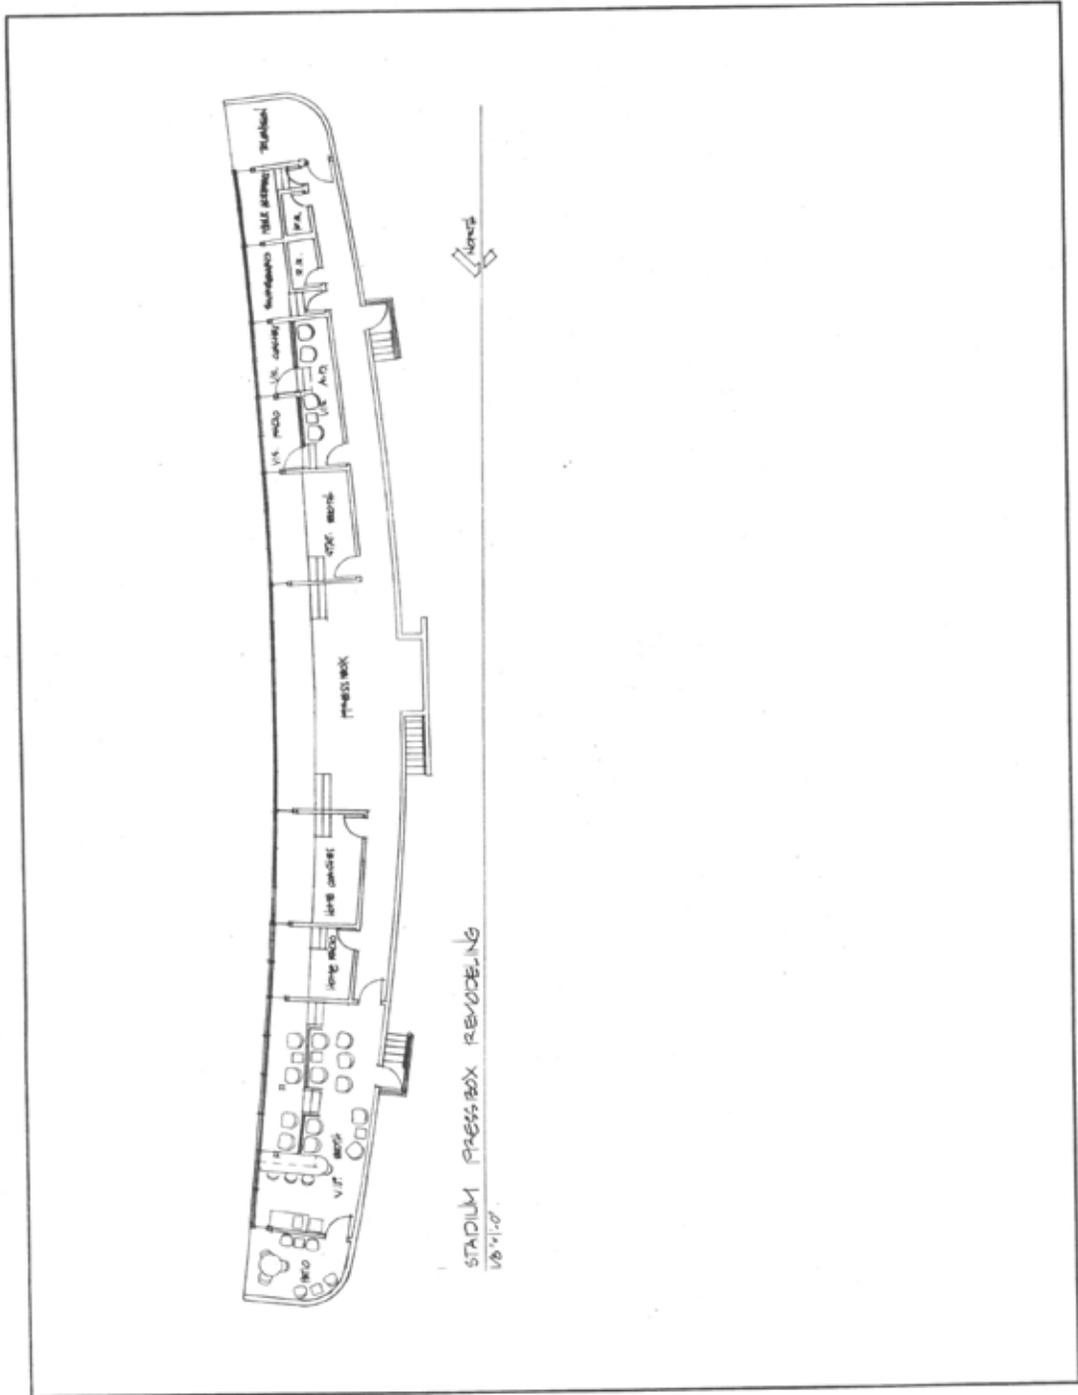

South entrance and scoreboard prior to the addition of the Fulton Athletic Center. (Left: Outside the stadium. Right: From inside the stadium.)

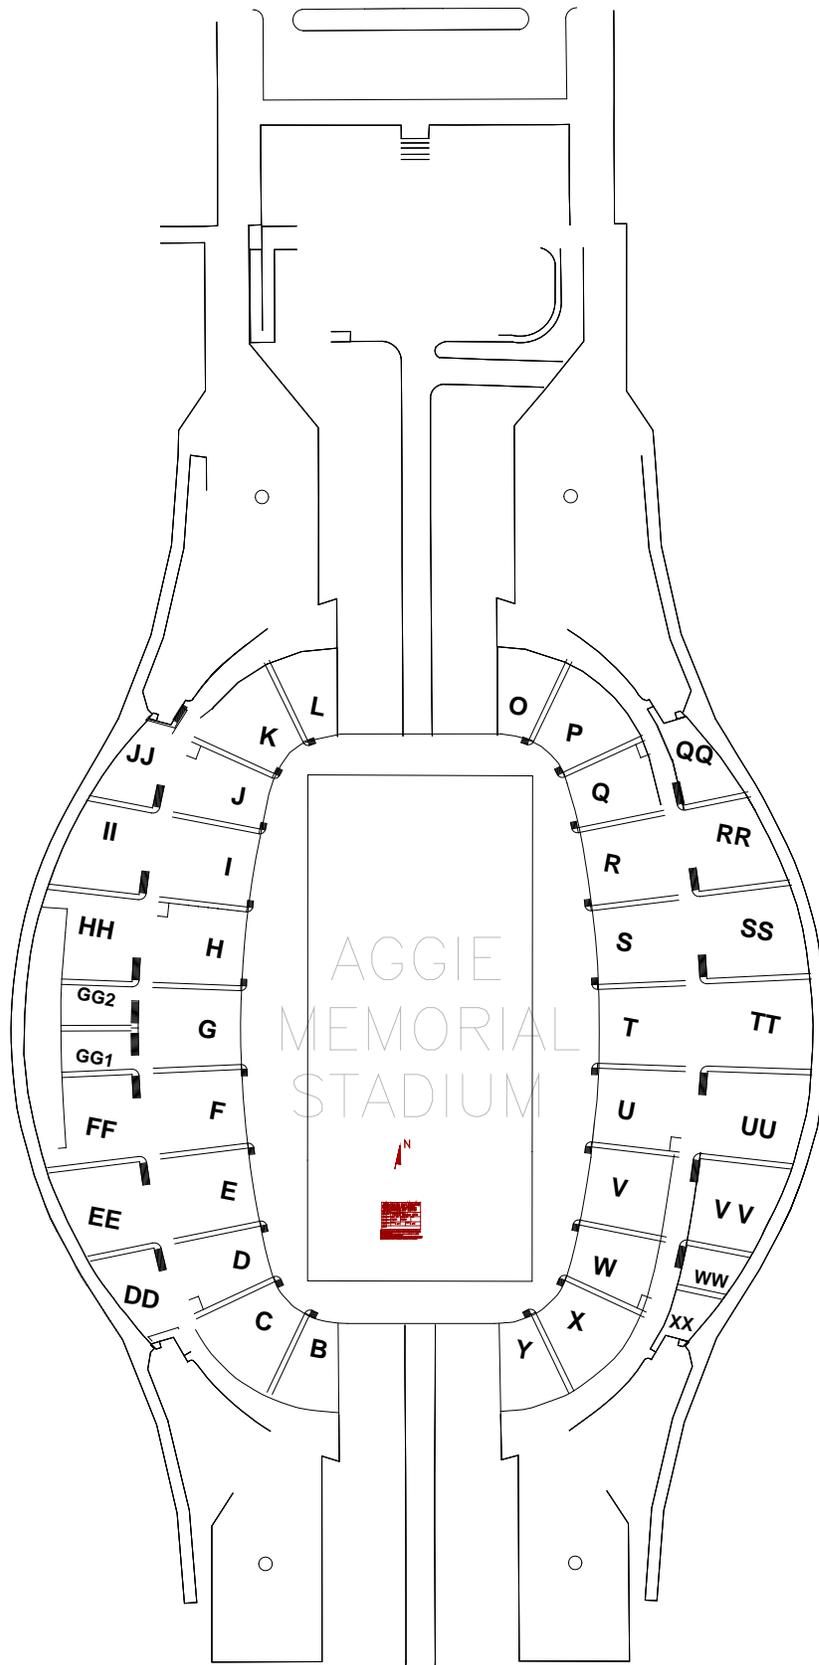

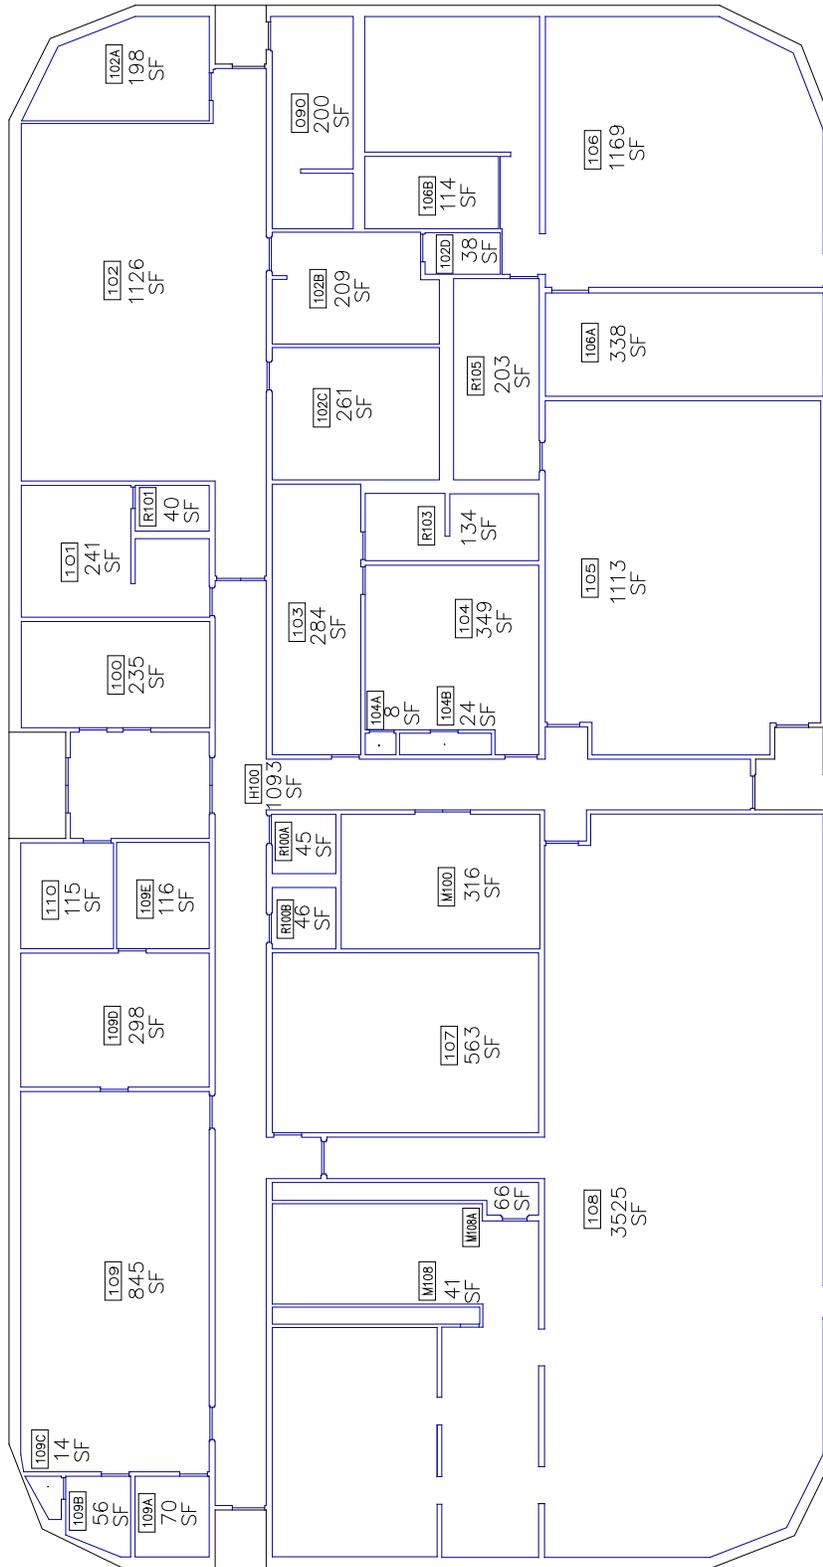

Looking north at the south side of the locker rooms.

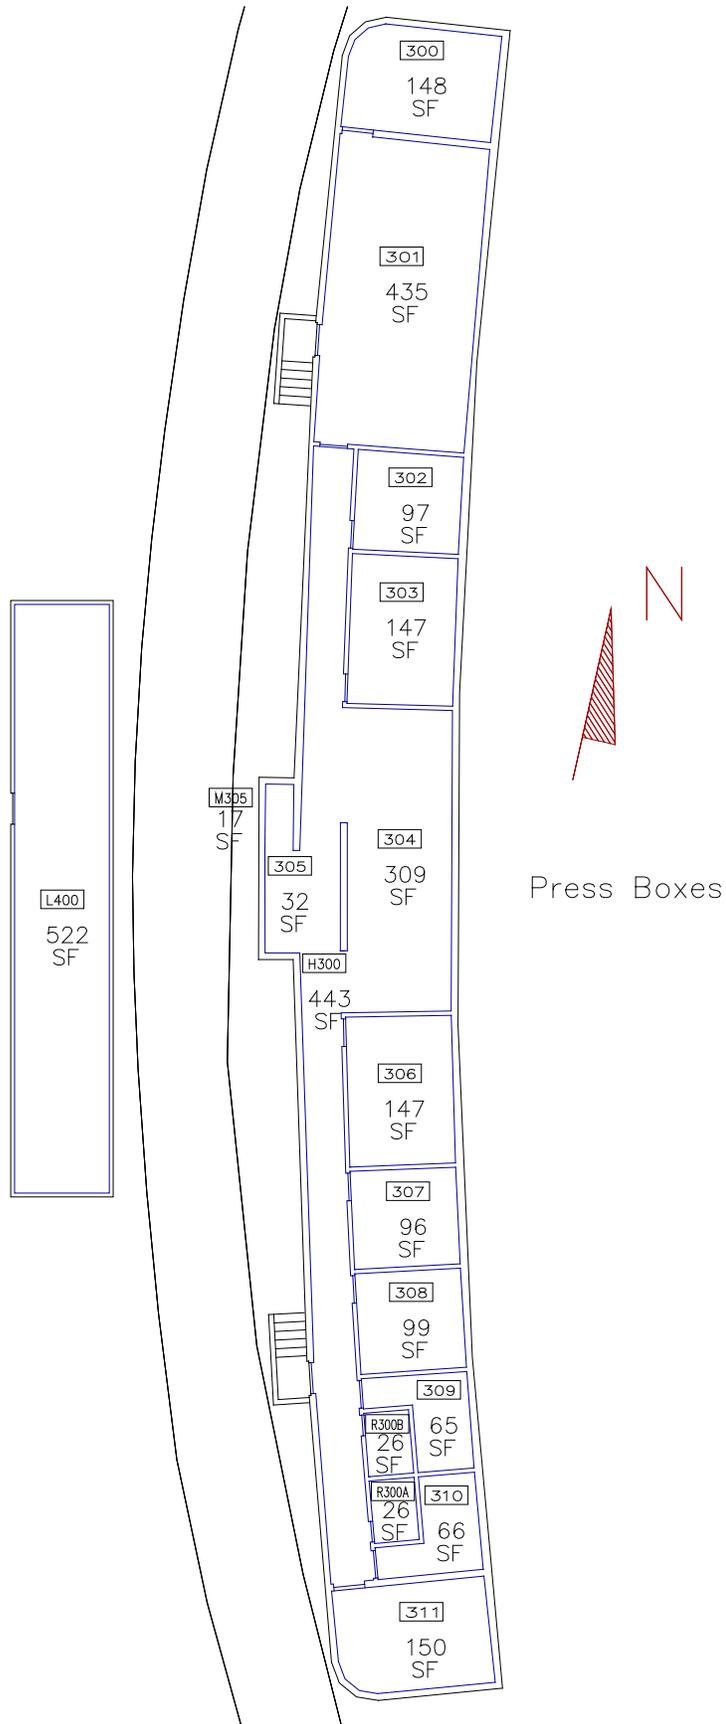

Ticket booth at the south side of the stadium.

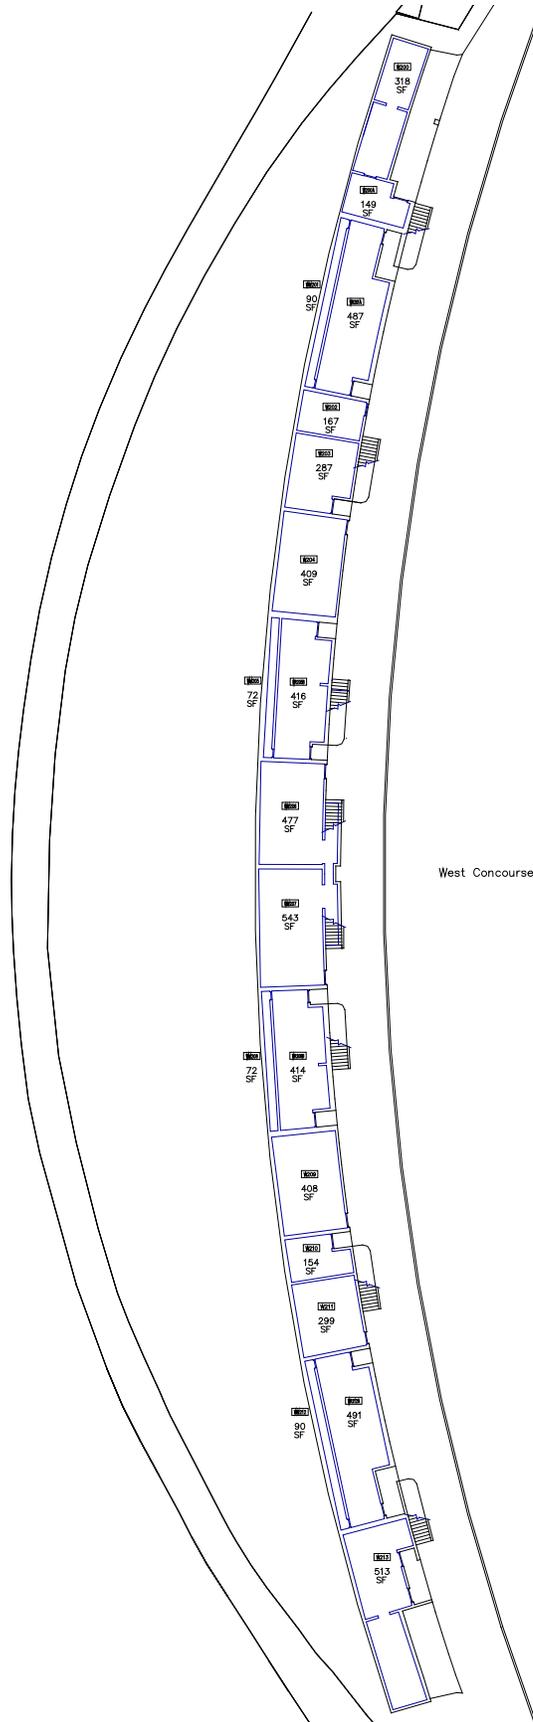

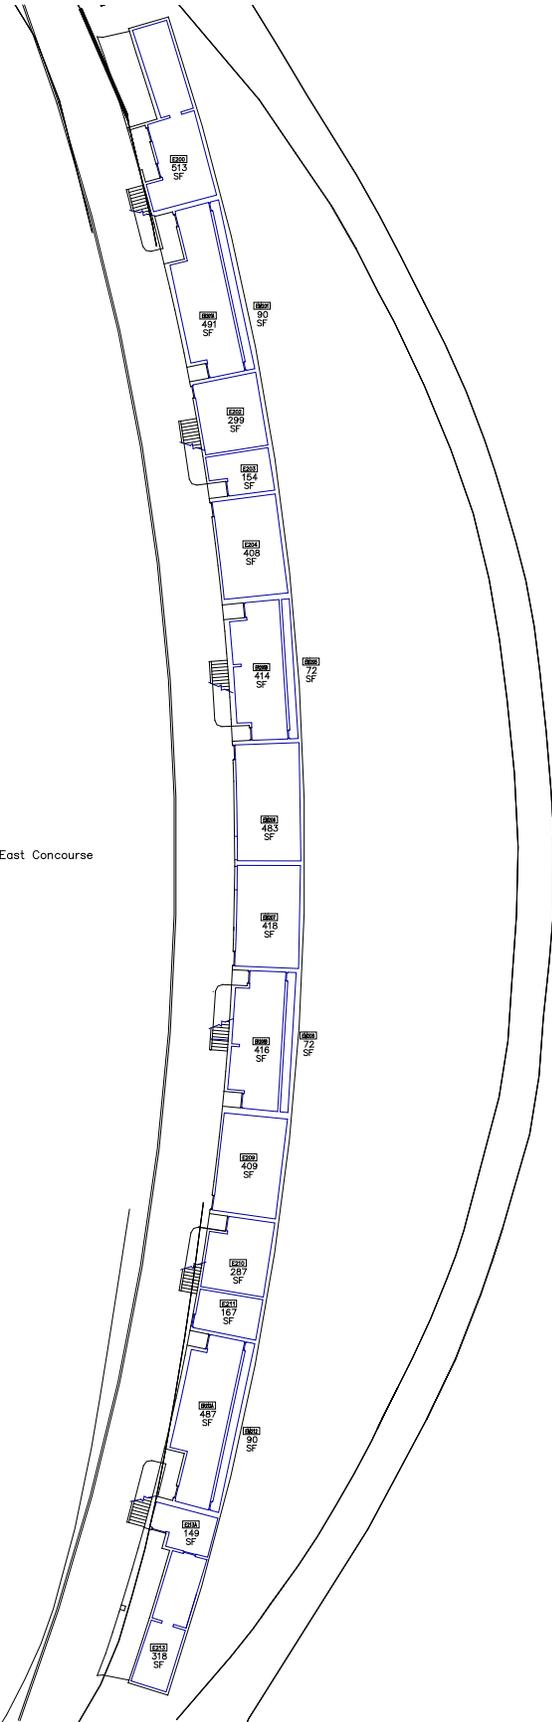

Locker Rooms

West Concourse

Memorial Stadium, Locker rooms, press box, and concourses

1st game played in new stadium was against Southern Illinois on Sept. 23, 1978. Capacity – 29,258.

The last game played in the old stadium was against University of Idaho on November 19, 1977 at 1:30 p.m. Unfortunately the Aggies lost to the Vandals 47-44.

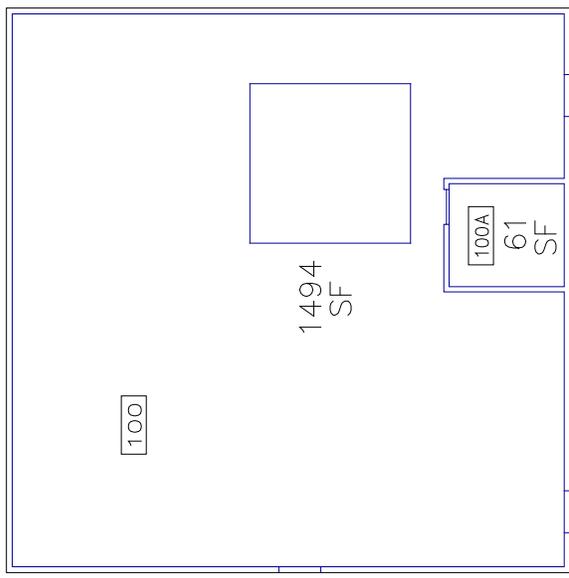

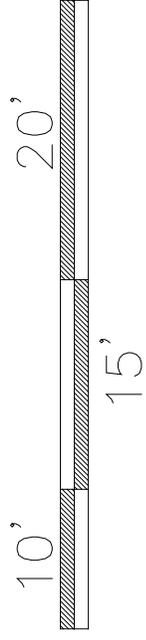

Aggie Memorial Stadium was completed in 1978 at a cost of \$3,650,000. The first season that the stadium was used was the fall 1978 season. The first home game was in September.

Construction has begun on a new stadium annex which is to be place at the south end of the stadium. See building 596 for more information on this addition.

#343 Air Test Facility

This building was constructed in 1978.

#355 Wells Hall

Photo of the northwest side of the building taken May 30, 1991.

Photo of the east side of the building taken July 11, 2004.

Wells Hall

This building original purpose was to be temporary housing for a large influx of students to the NMSU campus. It was constructed in 1978 and students lived there until an inspection found that the building was in violation of fire code because there was not enough exits from the living areas. The only way that students would have been allowed to remain living in the building would be if there was someone who kept watch 24-hrs. a day. So the building has been converted to office space and students were put in other accommodations for the semester.

Speech Building

This building was constructed in 1980. It was designed by W. T. Harris and Associates, and it was constructed by Wooten Construction Company.

#366 President's Residence

Front entrance.

Sign on Geothermal Drive.

"The Little Red Truck" by Peter Hurd

Great Room

Main entrance hallway.

View of A-Mountain from the back porch.

Back of house.

Back Entrance and Garage.

Preparing for Honorary Degree Recipient
Dinner.

President's Residence

Also known as the University Center and Residence

Constructed in 1979. President Emeritus Dr. Gerald Thomas was in office during the construction and his wife had a lot of input into the design of the house. The house is not just a home for the president of the university, it is also a location where dinners and other promotional events take place in the main living room and back patio. Both locations have a clear view of both the organ mountains and A-mountain. This home also features artwork by New Mexico artists that are both owned by the university and on loan from places such as Glenn Cutters Gallery.

Construction of the **University Center and Residence** was originally proposed at a March 22, 1976 Board of Regents meeting. In the minutes from this meeting, Dr. Gerald Thomas, University President, said "he was first approached in 1970 to look into the possibility of an alternate location for the President's Residence." Any progress on the project was delayed until there was pressure from the expansion of University Avenue and the outdated state of Nason House. The proposed building was designed "to meet the functions of the Presidency as determined by the Board of Regents." The original plan called for four bedrooms, a maid's room, a small office, a living-reception-dining area, a three-car garage, and a kitchen that is "adequate for most social functions." This 5,280 square-foot plan was adopted at this meeting. The source of funding was to be "from land income and cost recovery from University Avenue construction." By September of 1979 the Board had received bids from construction companies that had exceeded "the original \$371,516 [cost] estimate." Modifications were made to the original plans for the house and a \$337,759 bid from Mesa Associates of Mesilla Park was approved in November of 1979. Construction began in late fall/early winter of 1979 and continued until the summer of 1980.

While the University Center and Residence is primarily used as a home for the University's President, it also functions as a gathering place for social events hosted by the President.

Many of these events take place in the great room. The 1,055 square-foot room features an exposed beam ceiling, a fireplace, tile floor, and a view of the patio, which is also used for entertaining. In the great room, dinners, such as the Honorary Degree Recipient Dinner, and other social events are held to honor special guests. Events like these are held frequently at the University Center and Residence, and arrangements for them can take place days in advance. When preparing to host the many different events here, great care is taken to provide University guests with an enjoyable experience while visiting the University Center and Residence.

This building also functions as a gallery for art by New Mexico artists. Some of the art is owned by the University, while other pieces are on loan from local art galleries. "The Little Red Truck" by Peter Hurd, one piece that adorns the walls of the great room, is owned by the University. Other works of art are on display throughout the building.

The University Center and Residence is located on New Mexico State University property east of I-25. The building's location is unique because it shares the site with a geothermal well. New Mexico State University engineers started pumping water from the well January 18, 1980. "The connection of the well to the residence would serve as a demonstration for geothermal techniques in the southern New Mexico area" according to President Gerald Thomas at a March 22, 1979, Board of Regents meeting.

Today, the University Center and Residence no longer utilizes the geothermal well. Originally, water for the house came from a secondary geothermal well near the main one. Approximately ten years ago, the secondary well stopped working so the system was re-routed to work off of the main well that supplied the rest of campus. In early 2002 the building became completely independent of the resource because of problems with piping and because the water

supplied only heated to about 130°F, which was not hot enough for heating air. In the past the system has been supplemented by other sources of heating while utilizing the geothermal water. Currently the building is dependent on natural gas for space heating and electricity for other heating needs.

Building Facts -

- Four bedroom, three bath, three-car garage, kitchen, dining room, family room, great room, and maid apartment
- Square Footage: 6,568 sq. ft.
- Architect: Gerald Lundeen
- Construction Company:
Mesa Associates of Mesilla Park
- Construction Cost: \$337,759
- Construction started: Late Fall 1979
- Construction Completed: 1980

University presidents who have called this building home...

- 1979 - 1984 Dr. Gerald W. Thomas
- 1984 - 1994 Dr. James E. Halligan
- 1995 - 1997 Dr. J. Michael Orenduff
- 1997 - 2000 Dr. William B. Conroy
- 2000 - 2003 Dr. G. Jay Gogue
- 2004 – Present Dr. Michael Martin

Cervantes Village, Vista Del Monte, and Vista Del Monte Community Center

These buildings were constructed in six phases. The 1st phase was buildings 387 A, B, C, D, & E, and it was completed in 1983. This consists of 42 4-bedroom units. The 2nd phase was completed in 1984 and it was building 388, the Vista Del Monte Community Center. The 3rd phase was buildings 413 F&G constructed in 1989 and it contains 16 4-bedroom units. In 1991 buildings 415 H&J, consisting of 12 2-bedroom units and 4 efficiency units, were constructed. The following year the Aggie Express Convenience store, building 471, was constructed along with buildings 462 K,M,N,& P. The final phase was constructed in 1995 and it consists of buildings 526 Q,R,S,T,U,V,W,&X. Each of the 426 and 526 buildings have two apartments that each contains two bedrooms, 1 bathroom, and a living room/kitchen area. These housing units have buildings to meet ADA requirements. The single story buildings (#387,413, & 415), were renamed Cervantes Village at the January 13, 2004 Naming Committee meeting. (ACAP)

#389 Music Building

Photo of the main entrance taken July 11, 2004.

1984 Dedication plaque for the Music Building.

Music Building

The oldest part of this building is a Trost & Trost building that was constructed in 1911. This section of the music building was originally a gymnasium and armory for the ROTC program. In the top floor of the old Gymnasium section of the building you can see the rail supports for the old running track. Now the gymnasium section of the building is where faculty offices, and practice rooms are located for the music department. The newest portion of the music building now contains offices and an auditorium and was constructed in 1983.

Second Floor 21,078 GSF

John Whitlock Hernandez Hall

This building was originally known as Engineering Complex II. Its construction was authorized in 1986. Construction began in 1988 and was completed in 1989. The architect was Brown Burton & Partners, Inc. Silverton Construction Company was the general contractor. Engineering Complex II became John Whitlock Hernandez hall on October 11, 2002.

John Whitlock Hernandez

Dr. John Whitlock Hernandez is a native New Mexican who was born and raised in Albuquerque. His family has political ties that date back to the early statehood of New Mexico. His grandfather was first elected as a member of the House of Representatives in 1912. At that time the state had only one Congressman. His Uncle Ben Hernandez served as Chief Justice of the State Court of Appeals and U.S. Ambassador to Paraguay from 1965-1968.

He earned his B.S. from UNM in Civil Engineering in 1951, a M.S. from Purdue in Sanitary Engineering in 1959, a MS from Harvard in 1963 in Environmental Engineering and a Ph.D from Harvard in 1965 in Water Resources Management.

Dr. Hernandez's military service included a US Navy commission in 1951 and active duty from 1951-1954. He retired as Captain in the Navy Civil Engineering Corp Reserve in 1981. His early engineering experience included positions with the N.M. Game Department, State Engineer's Office, and the State Sanitary Engineering Bureau.

Dr. Hernandez joined the Civil Engineering Department at NMSU in 1965 as an Associate Professor and was tenured as a Full Professor in 1968. He created the N.M. Environmental Institute with Sandy Dickpeddie of Biology in 1970. He co-directed the Southwest Center for Women and Minorities in Engineering funded through a \$4 million grant he obtained (with UNM) from NSF in 1975.

From 1975 through 1980 he served as Dean of Engineering. During his tenure as Dean, College enrollment increased from 1135 in spring of 1975 to 2300 in the fall of 1980, basically by recruiting Hispanic, Native Americans and women into engineering. During this time he strived to improve salaries and there were increases that have only been matched in the past year. He solidified the foundation of the Engineering Technology and Industrial Engineering Departments. Assisted by an excellent set of Department heads and then Associate Dean C.Q. Ford; the College grew and prospered with faculty numbers increasing from about 45 to about 80. Research grew as did industrial gifts and alumni giving to the College

In February of 1981, on leave from NMSU, he was named Deputy Administrator of the U. S. Environmental Protection Agency. He received Senate confirmation in April 1981. In March 1983, he became Acting Administrator of the US EPA. In May of that same year, he resigned to take a post with the U.S. Energy Department. After nearly a year, he returned to NMSU in January 1984. He continued to be an outstanding teacher and researcher at NMSU from 1984 until his retirement from NMSU in 1999, He taught Engineering Economics, Hydrology, Solid and Hazardous Waste Management, Water Resources Management, and a senior design course in Water and Waste-water Treatment.

Dr. Hernandez published research studies for the Bureau of Reclamation (four on the management of endangered fish in New Mexico streams and a base-line water quality study on the

Rio Grande from San Marcial to Fort Quitman, Texas); for the New Mexico Interstate Stream Commission (on the Gila River and the Pecos River and on management of the phytatophytes); for the New Mexico Water Resources Research Institute (on the Pecos River, the lower Rio Grande, and the use of saline water in New Mexico); for the City of Gallup on their drinking water supply; for the NM Game Department on recycle of hatchery water; for the NM Health Department development of New Mexico's first set of water quality standards for all interstate streams; and for the United Nations (Manual on Hazardous Waste Management and a study on the water Supply for Antafogasta, Chile). He has published over 50 articles, major reports and manuals including one on Urban Land-Use Management for New Mexico.

His awards include: a letter of commendation in 1970 for work on Air and Water Pollution from President Richard Nixon; N.M. Governor's Award for Public Service in 1980; received the College of Engineering's Donald C. Roush award for teaching excellence in 1990, the Outstanding Alumni Award from University of New Mexico Civil Engineering Department in 1992; UNM Zia Award in 1998; member of many state and federal committees and boards.

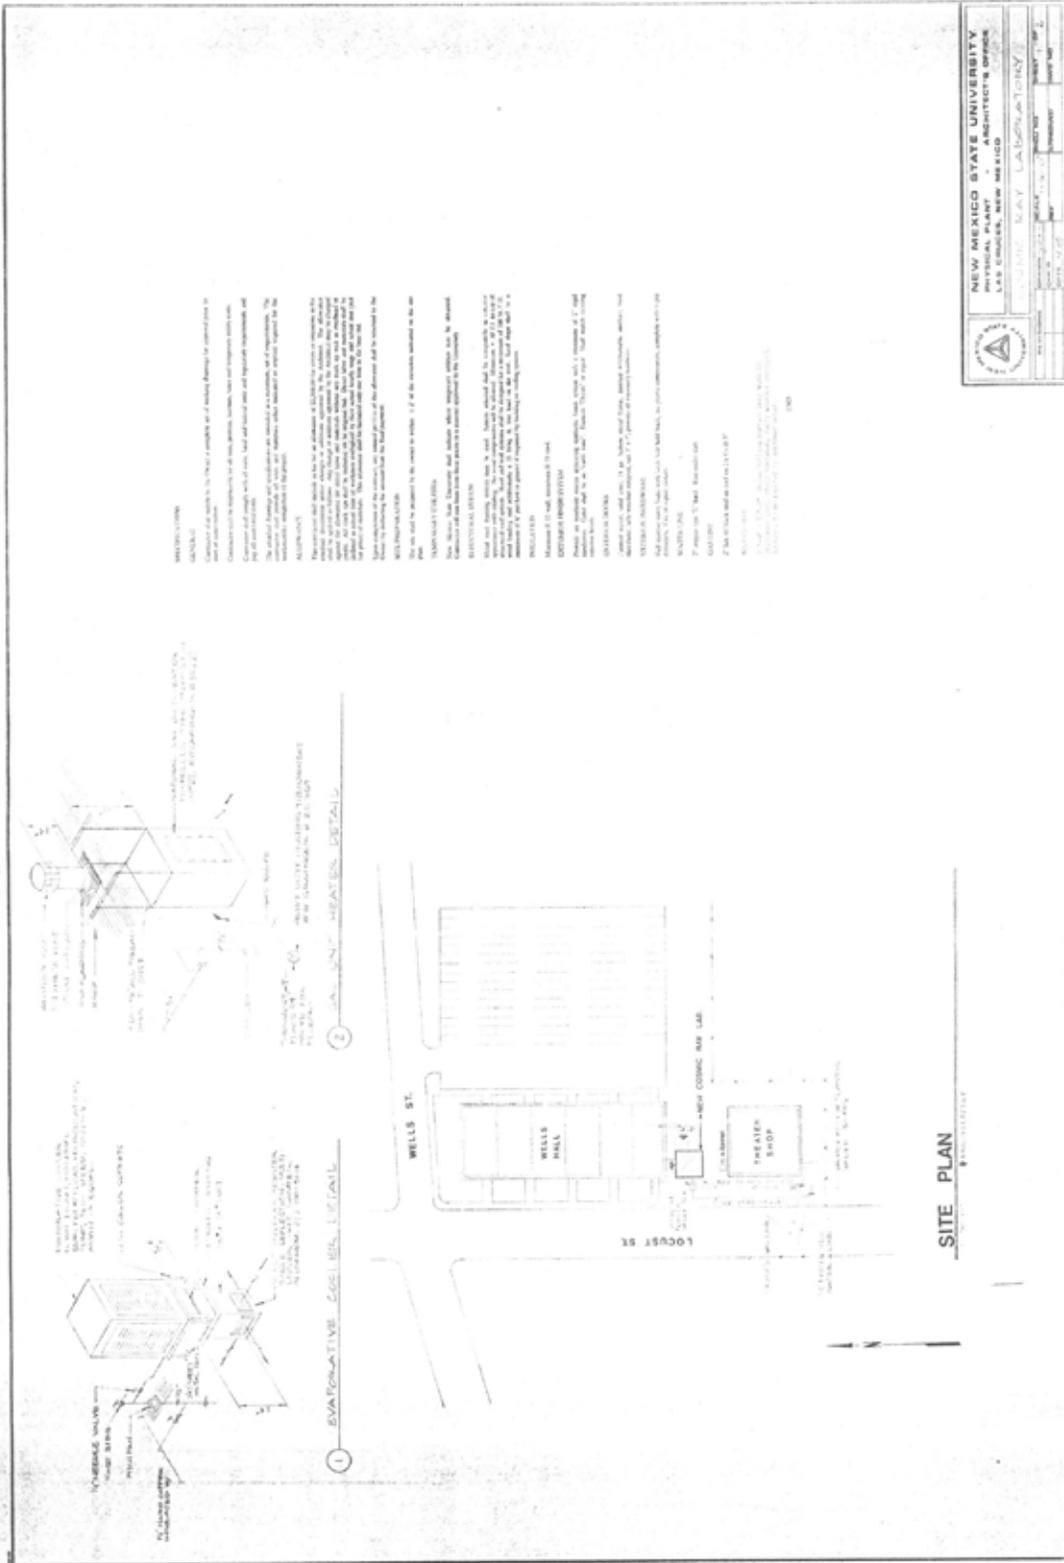

He feels that his best contribution to New Mexico were the years 1965-1974 when he taught Highway Design and Water Resources. Many of his students are now leaders in these fields, one serving as head of the State Highway Department and another Chief of the Office of the State Water Engineer. A number of his students have commented that he was among the best professors ever. Another student commented "You could always call him after hours at home to obtain help with a homework problem."

LIBRARY BUILDING STUDY

During the 1987 legislative session New Mexico State University received \$75,000 to undertake a library building feasibility study. The funds will be used to hire a library building consultant who will conduct an assessment of existing library space and assist in the development of a master-plan for the substantial improvement of library facilities for the next decade and beyond.

Every effort will be made to keep the academic community abreast of developing plans. It is expected that the consultant for this project will be selected by the middle of May. The first phase of the study (analysis of needed library space) is expected to be completed by the end of summer.

From "Library Building Study" found in the New Mexico State University Library Newsletter, Page 1, Vol. 2, Number 2, May 1987.

BOARD OF REGENTS APPROVES BUILDING NEW LIBRARY

There is one important aspect of the library on which we wish to report to the University community. In May 1987 Aaron Cohen Associates was retained as project consultant to undertake a library building feasibility study in conjunction with the 1987 state appropriation of \$75,000. The major purpose of the study is to articulate a long range master plan for improving campus library facilities at NMSU.

The University administration has made the library its number one capital improvement project. The NMSU Board of Regents at its July meeting approved the recommendation and plan that calls for the design of a 260,000 gross square foot library building to be placed at the east end of Frenger Street (McFie Circle parking lot). It is proposed that the new library be constructed in two phases. In the first phase 130,000 gross square feet will be constructed and several years hence a second phase of another 130,000 gross square feet will be added. Also

included in Phase I will be the construction of a 13,000 gross square foot auxiliary compact shelving facility for little used materials and University archives. Phase I will cost approximately \$15,000,000. This capital improvement request will be submitted to the New Mexico Legislature in January 1988.

From "Board of Regents Approves Building New Library" found in the New Mexico State University Library Newsletter, Pages 1-2, Vol. 2, Number 3, September 1987.

LIBRARY BUILDING ADVISORY COMMITTEE NAMED

In connection with the planning efforts for a new library, Executive Vice-President William Conroy has appointed a library building advisory committee. The committee's purpose is to represent the broad spectrum of library constituents and will serve as an advisory group to the Dean of the Library, project consultant, and subsequent architect. It will provide input on the development of a building program to address space needs for collections, services, study, and staffing. More importantly, the committee is charged to ensure that plans for any new library facility are 1) commensurate with the nature and quality of the University's present academic programs, and 2) flexible enough to accommodate future technological changes in library operations and NMSU's academic programs.

Members of the committee include: Dr. Hiram Davis, Chairman; Dr. David Baron, Accounting & Business Computer Systems; Dr. Joe Denk, University Computer Center; Dr. Peggy Elder, Vice President of Student Affairs; Dr. Gerry Giordano, Curriculum & Instruction; Dr. Richard Rundell, Drama; Cheryl Wilson, University Library; Dr. Gary Donart, Animal & Range Sciences; Dr. Thomas Gale, Dean of the College of Arts & Sciences; Tammy Jebb, NMSU graduate student; Molly O'Nan, President of ASNMSU; Dr. Ray Sadler, History; Dr. Derald Morgan, Dean of the College of Engineering; and Dr. Bruce Street, Vice President for Development.

From "Library Building Advisory Committee Named" found in the New Mexico State University Library Newsletter, Page 2, Vol. 2, Number 3, September 1987.

IMPROVED LIBRARY FACILITIES

The quest for new library facilities is one project that has garnered support from all segments of the campus community. We are confident with sustained campus support, the voters will approve the \$11 million bond issue.

In terms of end results, the new library will provide faculty with a new and powerful teaching resource, one with an enormous pervasive capacity for different interactions and learning relationships among students, professors, researchers, and technology.

From "Directions for the University Library – A report from the Dean of the Library" found in the New Mexico State University Library Newsletter, Page 1, Vol. 3, Number 1, April 1988.

T

THANKS TO THE VOTERS OF NEW MEXICO

NMSU has a new library in its future. During the November 1988 general election voters approved the \$45 million Educational Facilities General Obligation Bond Issue which included \$11.1 million for a new library facility.

We wish to express our thanks and gratitude to the University family and the many friends who contributed so generously of their time, effort, and votes in support of the bond issue. You made the difference!

Now That We Have the Money What Next? Continuing with the work that was done as part of the Library Building Feasibility Study in 1987, a building program statement and design guidelines have been completed. This information will be incorporated into a Request for Proposal (RFP) and supplied to in-state architectural firms who, in turn, will submit bids for the project.

Early spring has been targeted for preparing and distributing the RFP, reviewing interested architectural firms, and then forwarding the names of several acceptable firms to the Board of Regents for final selection. It is anticipated that from start to finish it will take approximately two years to complete the library building project.

Planning for the New Library-- Several committees will play key roles with respect to the library building project. First, there will be an internal Library Building Committee that will work directly with the architect in the design and detailed plans on

the functional layout of the facility. Members of this committee are: Lowell Duhrsen, Associate Dean; Bartley Harloe, Head, Collection Management; Valerie Horton, Systems Librarian; Anne Morgun, Head, Technical Services; Karen Stabler, Head, Information Services; Bonnie Wetzel, Library Faculty/Professional Staff Representative; Cheryl Wilson, Head, Special Collections; and Hiram Davis, Dean, Chairperson.

In addition, the University Administration has appointed a Library Project Oversight Committee to review all plans and recommendations on the project and to make all final recommendations to the Executive Vice President. Members of the committee are: Dr. Bruce Streett, Vice President, Development; Dr. Thomas Gale, Dean, College of Arts and Sciences; Dr. Lowell Duhrsen, Associate Dean, Library; Dr. Don Merrill, Chair, Faculty Senate; Professor Cheryl Wilson, Head, Special Collections; Professor Bartley Harloe, Head, Collection Management; and Hiram Davis, Dean, University Library (Chairperson).

To ensure campuswide input into the library building project and to keep the larger audience of library constituents up to date on the developments of the new library facility, there is a University-wide Library Building Advisory Committee. Members of this advisory group include: Dr. David Baron, Professor, Accounting & Business Computer Systems; Dr. Joseph Denk, Director, University Computer

Thank You and Congratulations
NMSU

On behalf of the NMSU Library faculty and staff, I wish to express my personal thanks to members of the university community for your support of the Educational Facilities General Obligation Bond Issue. Throughout, students, faculty, staff and administration have contributed greatly to efforts at building a new library for NMSU. As a result of all working together, we have taken a big step in the realization of this goal.

I would especially like to acknowledge all the individuals, including those associated with the following organizations, for their help with the Library Phonothon:

*Agricultural Economics Club
Agricultural and Home Economics Council
Alpha Zeta
American Marketing Association
Arnold Air Society
Arts and Sciences Council
ASNMSU
Business Administration & Economics Council
El Ojito
Engineers' Council
Farm House Fraternity
Hispanic Educators Association
Le Cercle Francais
Library Staff
National Student Speech-Language-Hearing Association
NMSU Development Office
Phi Alpha Theta
Pi Beta Phi
Presidents' Associates Scholars Club
Sigma Delta Chi
Student Dietetics Association
Student Library Action Committee*

The volunteers called 11,000 in-state alumni requesting their support for the bond issue. The telephone calls had a real impact on our success, and we appreciate those who volunteered their services for this cause.

Congratulations NMSU. We look forward to the completion of the new library.

Hiram L. Davis
Dean, University Library

Letter from University Library Dean Hiram L. Davis, found in the New Mexico State University Library Newsletter, Insert Page, Vol. 4, Number 1, January 1989.

Planning for the New Library--The NMSU Board of Regents at its May 1989 meeting selected the Albuquerque firm of Dean/Krueger and Associates, Inc. to design the new library facility. The design phase will begin this fall and will be completed by the end of the spring semester. Approximately one year will be required for construction. The \$11.1 million new high-tech library is targeted for occupancy in the fall of 1991. Future issues of the newsletter will report on the progress of the library building project.

From "Bienvenidos!" found in the New Mexico State University Library Newsletter, Page 1, Vol. 4, Number 1, January 1989.

<h1 style="font-size: 4em; margin: 0;">L</h1>	<h2 style="margin: 0;">ibrary Building Project Continues on Schedule</h2>	
	<p>Hal Dean, architect of the new NMSU Library, is designing a building which will become the focal point for the campus. The building will be located in McFie Circle south of Milton Hall. The site was chosen because it locates the library in the center of the campus and provides space for the next phases of the building project.</p> <p>The project is a challenge for Dean since he is designing not only a library but also a new mall linking the old library to the new as well as continuing on to the International Mall. With landscaping, art, and walkways, the library site will become the campus hub.</p> <p>The Library Building Committee, working with the Dean/Krueger and Associates, Inc. staff, has completed the programming phase of the project. Currently the architectural staff is finishing the schematics for the building which will house the library's education, humanities, and social sciences collections, and the Library Administration offices. Branson Hall will continue to be used as a library facility housing the agriculture, business, science, and technology collections as well as the University Archives and the library's special collections. The Technical Services and Collection Management departments and the Government Documents unit will also remain in Branson Hall. The building project should be bid by the end of August</p>	<p>and construction completed in early 1992.</p> <p>Members of the Library Building Committee are Lowell Duhren, Interim Dean of the Library; Thomas Gale, Dean of the College of Arts and Sciences; Valerie Horton, Systems Librarian; Anne Morgan, Interim Associate Dean of the Library; Karen Stabler, Head of Information Services; Bonnie Wetzel, Head of the Serials Records Unit; and Cheryl Wilson, Special Collections Librarian. University Architect Martin Hoffmeister is the university's liaison to the committee.</p> <p>Dean's firm has experience in library design as well as other public buildings. The firm designed the University of New Mexico Centennial Library and a library for Sandia National Laboratories in Albuquerque, the Mustang Library in Scottsdale, Arizona, and the Thomas Branigan Memorial Library in Las Cruces. On the NMSU campus, he designed the Educational Services Center and the Business Complex. His designs reflect his concerns for lighting and energy use. He believes good design is how a building functions more than how it looks, however, its looks can create excitement and increase its use. </p>

Architect Receptions -- Meet the architect, Hal Dean, who is designing the new library at New Mexico State University. Over the next few weeks, informal receptions are planned for alumni and friends to talk with the architect about the \$11 million facility. Dean hopes to design the building as a "magnet" to draw students and faculty into the intellectual heart of the campus to suggest "where the action is." He adds that "libraries articulate the soul of a community." To place your name on the invitation list to meet the architect call 646-3102 or 646-5781.

Hal Dean, architect for the new library, explains ideas for the building to library staffer Leigh Ann Sharp during the library Homecoming Reception

esign for New Library Receives Approvals

View from Library Entry Court

North Building Edge

The architectural plans for the new NMSU Library have been approved by the NMSU Board of Regents, the Commission on Higher Education and the New Mexico State Board of Finance. The plans and a model of the building are on display in the lobby of the library. The Library Building Committee is working with the Dean/Krueger and Associates, Inc. staff, architects for the project, in completing the design development phase of the project. The building project is scheduled to go to bid late August 1990 and completion date is targeted for early 1992.

The 89,011 square foot building will have three floors. Library service points, circulation, reference, and interlibrary loan, will be located on the first floor. The library's administrative offices will be located on the second floor. Both the second and third floors will house the book collection and study areas. The periodicals (paper, bound, and microform) collection will be housed in a Periodicals Room on the first floor.

Library Will Be Closed in July-- Most Services Unavailable

Faculty teaching during the second summer session, July 6-August 12, need to anticipate the disruption of library services, particularly for use of materials in the social sciences, humanities, and education. Library materials for these disciplines will be moved to the New Library.

IE 7
 IR 1
 I 1992
 ION, EDITOR

The New Library is in the final stages of construction to be completed in April. Network and telephone cabling will be installed in May; furniture and equipment will arrive during June; and library staff and materials will move into the facility during July. Planning continues to ensure an efficient move with minimal disruption in library services and access to the collections by faculty, staff and students.

A time-line has been developed for a professional library moving company to pack,

move, and unpack the library materials. The tentative dates are as follows:

July 5 - 12

Branson Library will be open on an abbreviated schedule. Hours and available services will be announced later. During this time, staff will be preparing the materials for the move.

July 13 - 19

Almost all parts of Branson Library will be closed. The actual moving of materials will take place this week. Books remaining in Branson will be rearranged and shifted.

July 20

The projected opening date for the New Library. All services will resume in Branson Library.

Library staff will keep you informed about reduced hours, access, and services through this newsletter, *The Round Up*, bulletins and/or memoranda as moving preparations continue. Questions regarding the move can be directed to Associate Dean Lowell Dahrsen at 646-1809.

Jeanne G. Howard
 Head, Collection Management

Learning Two Libraries

Donald Barclay
Reference Librarian
e-mail: dbarclay@lib.nmsu.edu

From informal observation, it seems that about half the students at NMSU believe Branson Hall is permanently closed or soon will be. There was at least one student who was under the impression that New Library is where all the new books will go, and another who was quite livid that the College of Business was getting the brand-new library all to itself.

Clearly, some re-education is in order. Library users need to understand that New Mexico State University has one library that is split between two buildings. With few exceptions, materials dealing with agriculture, business, engineering, health, and science are in Branson Hall. Materials dealing with arts, education, humanities, and social sciences are in New Library. (Archives, U.S. Government Documents, and Special Collections will remain in Branson Hall.)

One tool that will help educate students and faculty about the splitting of the library is the free publication *NMSU Library: A Guide to Branson Hall and New Library*. This guide contains maps of both library buildings as well as detailed

information about the kinds of materials contained in each building. Copies of the guide can be picked up at the reference desk in either library building.

OLE, the NMSU Library online catalog, will also help library users cope. The holdings of both library buildings are accessible via OLE, and OLE tells users whether a book is in Branson Hall or New Library.

Even with these aids, the "basic users" who make up 60% of the NMSU Library user population will need help to become successful users of the two library buildings. Basic users tend to avoid electronic systems, so OLE will not help them figure out what books are where. Even worse, basic users tend not to talk to librarians, so it is unlikely they will have the two-library system explained to them or will be handed a guide to the library. Because basic users are often unsuccessful in the library, they are less satisfied with the library than are expert users and are more likely to turn in badly researched—or even plagiarized—papers and projects.

The best solution to the problems basic users will face with a two-library system is course-oriented library instruction. Far from being a tour, course-oriented instruction engages basic users by instructing them in library materials and library research skills needed for a specific, pending class assignment. Under such motivation, basic users are surprisingly responsive to library instruction and quickly lose some of their fear of libraries.

Course-oriented instruction cannot occur unless faculty make time to bring their classes to the library. Faculty and graduate assistants who wish to schedule a course-oriented library instruction session for any of their classes may do so by calling Donald Barclay at 646-6171. Faculty and graduate assistants who wish to develop an effective library assignment for their classes

should call the same number to arrange an appointment with a librarian subject specialist who will consult with them on developing their library assignment.

For those who may be familiar with the kind of large university where ten or twenty libraries may exist on a single campus, the thought of two

libraries is not daunting. For basic users, many of whom come to NMSU from small New Mexico towns, the two library buildings at NMSU will be no less than terrifying. With understanding and cooperation, however, teaching faculty and library faculty can turn the taming of our two-library system into one of the richest, most-rewarding learning experiences a student can have.

From "Learning Two Libraries" found in the New Mexico State University Library Newsletter, Pages 1-2, Vol. 7, Number 2, October 1992.

Reserves Moved to New Library

Holly Reynolds
 Circulation Coordinator
 e-mail: hreynold@lib.nmsu.edu

With the opening of New Library, the Circulation unit is pleased to announce several staffing changes. Cynthia Watkins will be in charge of circulation operations in Branson Hall, and Sandra Valenzuela will now be coordinating the Reserve collection in New Library. Sandra is a familiar face to University staff and students, having held positions in both Government Documents and Interlibrary Loan.

The Reserve collection is now housed entirely in New Library, regardless of discipline. Several faculty members have already inquired about this arrangement, but several factors made this option appealing. The primary consideration is

staffing. If the collection were split between the two buildings, neither could be maintained easily. In addition, New Library will feature a copy center opening in mid-October. New Library also provides more seating and quieter study areas for using the Reserve materials. Most Reserve items are stand-alone readings not used in conjunction with other materials, but should additional comparisons be needed, simply request that folders be allowed to leave the library and they could be used in Branson.

As with many of the Library's operations, this semester is a trial period and feedback would be greatly appreciated. The largest percentage of Reserve materials are placed by the humanities, social science, and education departments, but we must also be able to serve the other areas as well. Should you have questions or comments, please contact Sandra at 646-4441 or 646-6910.

From "Reserves Moved to New Library" found in the New Mexico State University Library Newsletter, Page 5, Vol. 7, Number 2, October 1992.

NMSU Library Move Bookin' to Library

Books that were tagged to be moved to New Library were carefully packed into sturdy boxes.

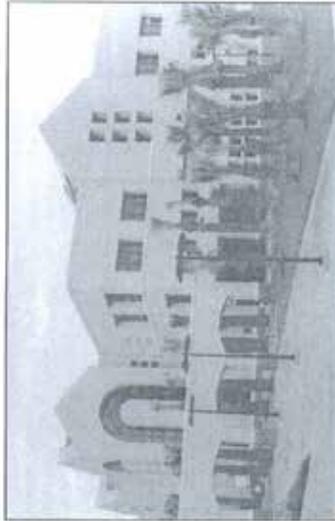

A detailed map of New Library's shelving scheme was drawn up before the move to insure the books being moved would fit on the shelves and would go to the correct shelves.

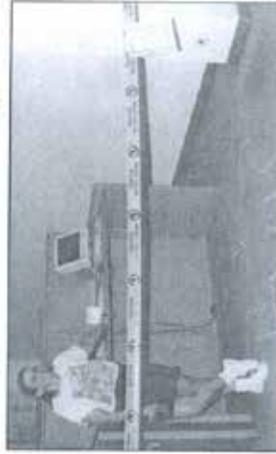

Library Dean, Charles Townley, joining the last load of books into one of the moving trucks.

Both the move itself and the number of people used a number of tired souls by the end, including the Library Coordinator.

New Library officially opened on July 27, 1992. The \$11.1 million, 49,000 square foot building holds the NMSU Library's art, education, humanities and social sciences collections.

And there was fun to be had. The yellow tape restricting areas of Thomson precepted a mock crime scene. Idea compliments of Library Development; body outlines compliments of Holly Reynolds, Circulation Coordinator.

New Library Opens In-House Copy Center

Donnie Curtis
Reference Librarian
e-mail: dcurtis@lib.nmsu.edu

A scholar taking notes from a journal in the library is a rare sight, these days. A more common sight is of lines at the photocopy machines as people wait to take full possession of information from journals, reference books, or reserve readings. Millions of sheets of paper are used every year in the library for photocopies, not including the heavy traffic in microfiche and microfilm copies. In response to demand from library users, a new service became available at New Library in October. A copy center, staffed 78 hours a week and equipped with state-of-the-art copying machines, can now take care of all copying needs, including the need for paper copies of microfiche and microfilm articles.

The library copy center, located adjacent to the main lobby on the first floor, is not trying to compete with other local services. Its main function is to provide quick service and high-quality copies of materials that are not allowed out of the

library, and especially of microfiche and microfilm materials, whose formats are offensive to many users. Most copying can be done on the spot.

Transactions are handled through the use of copy cards, the same cards that are used with the other photocopy machines throughout both libraries. The cards are obtained from a vending machine in either library, and the same machines

are used for adding credit to the cards. In New Library, the machine is on a wall next to the copy center. The photocopy machines in the copy center, like the other machines, make electronic deductions from the cards as copies

are made, but these machines charge more to include the service. The copy center charge is \$.12 per page for copies of paper items and \$.15 per page for copies of microform items. Do-it-yourself copying costs \$.07 per page for paper items and \$.10 per page for microfilm or microfiche items, plus maybe some time standing in line or threading microfilm. Copy center charges include collating and stapling and customized enlargement or reduction. ♦

New Library Copy Center Hours

Monday - Thursday	8 a.m. - 9 p.m.
Friday	8 a.m. - 6 p.m.
Saturday	10 a.m. - 6 p.m.
Sunday	1 p.m. - 9 p.m.

From "New Library Opens In-House Copy Center" found in the New Mexico State University Library Newsletter, Page 3, Vol. 8, Number 1, Spring 1993.

New Library wins two awards. The associated General Contractors of New Mexico Branch gave the Library a Best Building Award. The American Society of Interior Designers gave the library a design award for its interiors.

From "New Library wins two awards" found in the New Mexico State University Library Newsletter, Page 8, Vol. 8, Number 3, Fall 1993.

Memorial: The Faculty Senate has passed a memorial recommending that a new library structure be made a top priority of the University. You will recall that draft of this memorial was read at the retreat. A copy of the memorial can be obtained in the Administrative Offices.

From a memo from "In, out, and about the library / New Mexico State University Library", February 18, 1987.

FACILITIES

Support for the library facility has developed from all sectors of the campus and the community with editorials in support of the expansion, and particularly a new facility, in the Las Cruces Sun News and the Roundup. The NMSU students are mounting a letter writing campaign to the legislature. Cheryl Wilson and Dean Davis were instrumental in the production of a Library brochure which has been sent to 30,000 parents, alumni, government officials and other targeted individuals. The short session of the legislature will meet for 30 days starting in mid-January to consider the recommendation of the CHE for this building project.

From "In, out, and about the library / New Mexico State University Library", December, 1987.

^^^^^^^^^^^^^^^^NEW BUILDING PROCEDURE^^^^^^^^^^^^^^^^

To refresh everyone's memory, there are three committees involved in the selection of an architect. The process has begun and should result in a selection by the NMSU Regents in early May. The Internal Review Committee which is involved in the initial screening of the proposals consists of Hiram Davis, Lowell Duhrsen, Anne Morgan, Bonnie Wetzel, Valerie Horton, Karen Stabler and Bart Harloe. The Project Oversight Committee will be involved in the next round of screening and includes Hiram Davis, Lowell Duhrsen, Bart Harloe, Cheryl Wilson, Tom Gale (Dean of Arts & Sciences), Don Merrill (Chair, Faculty Senate), and Averett Tombes (Vice President for Research and Economic Development). A third committee, the University Library Building Advisory Committee, composed of people holding key campus positions, will be advisory as the project evolves.

From "In, out, and about the library / New Mexico State University Library", February 1989.

STATUS OF THE NEW BUILDING: A contract may already have been signed with Hal Dean at long last and the design stage of the new building should begin soon. Dr. Conroy has decided that three committees were two too many and has reduced the number to one. This committee, called the Internal Review Committee will be composed of Lowell Duhrsen, Tom Gale (Dean of A&S), Valerie Horton, Anne Morgan, Karen Stabler, Bonnie Wetzel and Cheryl Wilson. This Committee will work with the Architect, the construction firm of Cervantes and Associates, the Physical Plant Department and the University Administration on the details of this extensive project. Input from others, especially our Library staff, will be solicited through this Committee as the project progresses.

Cheryl Wilson has been intimately involved with the building project and has served on virtually all committees involved in the project thus far. I have asked that she assume an even greater responsibility over the expected several years that this project will take. Cheryl will work on a daily basis on the project and involve me when necessary, which will, no doubt, also be a daily basis. With my additional responsibilities as Interim Dean and the uncertainty of my "condition" in the coming months, it is vital that the Library be represented and provide direction in a steady and predictable manner.

In lieu of this (at least 2+ years) project and the considerable amount of time that will be involved from design to occupancy for Cheryl, I am "dereorganizing" the Special Collections/Archives unit and it will, at least for the duration of the building project, revert to its organizational structure at the time of the reorganization. Mr. Hoover will again assume direct responsibility for archives and the positions assigned to that unit at the time of reorganization. Cheryl will remain in charge of the traditional Special Collections Unit. Both Austin and Cheryl will report to the Dean's Office.

An office for the building project is being created out of Room 342 which will be useful for the projected voluminous files of correspondence, blueprints, small meetings, etc., that will occur over the next several years. Cheryl and Leigh Ann will staff this office as well as the Special Collections Office. The staffing of the Special Collections/ Archives Search Room will be handled jointly by Archives and Special Collections.

From "Library Update / New Mexico State University Library", September 1989.

THE "NEW" BUILDING: The signing of the architect, Hal Dean, was celebrated Homecoming weekend with a reception by the "Joy of Learning" sculpture and an Information Conference with the staff.

:It already appears that the building is getting smaller all the time. It will apparently only be able to contain between 60,000 and 65,000 usable square feet which is considerably less than the present building.

:With the concurrence of Dr. Conroy, accommodations for all special interest groups from graduate students, non library computer clusters, teleclassrooms, etc., will be housed in a remodeled Branson Hall in several years. To accommodate such activities in the new building would result in a group of special interest pods and little else. While plans for the ultimate housing of special interest groups will be planned for the new structure and its phase II in coming years, none will be placed in the new structure at the beginning.

:Members of the Building Committee made two trips to nearby locations of outstanding library buildings in Phoenix and Albuquerque. Two libraries designed by Hal Dean were visited.

:The Library has asked that Jane Conrow of Arizona State be hired as the Library Consultant.

Hal Dean, the Library Architect, will be on campus on November 5-6 and 13-14 to meet with the Library Building Committee and interested and affected individuals and groups both from within the Library, the campus and possibly the off-campus community.

From "Library Update / New Mexico State University Library", October 1989.

+++++++"NEW" BUILDING+++++++

The Building Committee has been continuously working with the project architect, the campus architect and the construction management firm in order to maintain the schedule. The interior of the building, thanks to the efforts of the Library staff who have provided input, is developing nicely and while the size is still discouraging, it should be a functional building capable of being a total facility with the other phases in the years to come. The latest exterior "boards" are on display in the Staff Room and the committee would appreciate your comments.

From "Library Update / New Mexico State University Library", February 1990.

The New Building

Earlier plans to keep bound volumes of journals in compact stacks have been scratched. After measuring the collection and the shelves, it appears that we would only have enough space for one year's growth! Bound volumes of journals will remain in the regular collection in the stacks. Otherwise, work continues on the interior design. Construction bids are due to go out in August. The Aggie Panorama features the new library building in its current issue. The ceremonial ground-breaking is scheduled to be either December 14 or 15 to coincide with the fall semester commencement.

From "Library Update / New Mexico State University Library", May 1990.

New Building:

Progress on the new library building seems terribly slow but groundbreaking is scheduled for December just prior to graduation. The itty-bitty details are taking more time, as expected, than the larger issues that have already been addressed. Thanks to all who continue to supply details and we are trying to convince the architects, project overseers, etc. that we know what we want and what we are doing. Of course the University is rapidly moving on to other projects and we struggle to remain on center stage for a while longer.

From "Library Update / New Mexico State University Library", June/July 1990.

The Library Building Committee has been in a period of inactivity pending the bidding of the building that will take place in October. As soon as we have the details on the amounts of money available for interior furnishings and equipment, we will begin again.

~ ~ ~ ~ ~

One of the proposed contractors for the new building is providing approximately 50 yards of the selected carpet for examination, durability testing, etc. The non public area with the most diverse traffic, including computer wiring, is the Circulation Desk. While the carpet may not have been what we might have selected for this facility, it will be a good opportunity to provide carpeting in an area that would not be otherwise possible.

From "Library Update / New Mexico State University Library", September 21, 1990.

The month of October is the critical one for the new building project. We are anxiously waiting to see if the bids are low enough to allow us to proceed with the majority of the equipment and furnishings for the new structure.

^ ^ ^ ^ ^ ^ ^ ^ ^ ^ ^ ^ ^ ^ ^

The saga continues with the art work for the new building. As announced in the media, the process will begin again as the contract with the previous artist was withdrawn. As of now, the plan for the same committee (Lowell and Cheryl are the Library's representatives) is to review the remaining nine finalists and come up with another recommendation.

From "Library Update / New Mexico State University Library", October 8, 1990.

NMSU LIBRARY UPDATE
November 9, 1990

Plans are underway for the new Library ground breaking on December 15, 1990. It would be very nice if as many Library employees as possible could be there. The ceremony will begin at 9:00 AM at the site in the parking lot between Milton and the Student Health Center. The ground breaking will coincide with graduation, the Board of Regents meeting and other festivities and activities planned for that day. As a result, the ceremony will be brief. The guests will then be invited to the Branson Hall lobby for a reception. The Library will be closed that day so only the lobby will be utilized. Many staff members are involved in this activity and their efforts on this special occasion are appreciated.

From "Library Update / New Mexico State University Library", November 9, 1990.

The Art Selection Committee for the library art project (Lowell and Cheryl are members) met and attempted to reformulate guidelines to insure an acceptable project. It still appears that the major "piece" will be an outdoor sculpture with a smaller project involving student art for the inside of the building. Sites for the project have been identified.

From "Library Update / New Mexico State University Library", November 30, 1990.

The Library ground breaking on December 15 was quite a show. Many Library employees were present to watch the horses pull the various dignitaries about. The reception following the ground breaking was well attended considering the many events being held on that day. All aspects of the occasion went smoothly due in no small part to the many people from the Library and the campus who were involved.

Much dirt is now being moved about the site. Hopefully, as construction progresses, organized visits can be arranged to view the progress. In the meantime, we can all be sidewalk superintendents just like the thousands who will soon reappear on campus to wonder what is going on.

From "Library Update / New Mexico State University Library", January 7, 1991.

Speaking of the new building. The first "construction meeting" at the site was held on January 30 with the Library Building Committee. Hopefully, more library staff can participate in the future, depending on the liability issue with the contractor and the University.

From "Library Update / New Mexico State University Library", January 31, 1991.

NEW BUILDING

The Library will begin erecting "test" shelving on the 3rd floor Xerox area for the new Library as it is received.

From "Library Update / New Mexico State University Library", March 19, 1991.

The new building is on schedule with the March completion date still holding. Keying has been completed with furniture selection in progress.

From "Library Update / New Mexico State University Library", June 7, 1991.

EVENT

On Monday, November 11, 1991, the staff enjoyed an extended lunch hour due to a four hour power outage caused by the attempt to "turn on" the power in the New Library. The staff should be congratulated on the calm and efficient manner in which they reacted. The police, fire department and physical plant were all summoned and the building was evacuated quickly and efficiently. It was immediately obvious, however, that the Library suffers from a lack of flashlights and the emergency lighting which was largely nonexistent or nonfunctioning. Both situations will be addressed. As this was an excellent and extended opportunity to review our emergency procedures. The Safety Committee has been asked to also review the situation and make recommendations.

From "Library Update / New Mexico State University Library", November 11, 1991.

NEW LIBRARY

The new Library, now officially but, hopefully, temporarily called NEW LIBRARY, is a few weeks behind schedule but still scheduled to be finished by mid-March. The bid document for the furniture is in the final stages of completion and will be sent to potential bidders in mid month. In early December the final selections will be made. This process is on schedule.

From "Library Update / New Mexico State University Library", November 11, 1991.

ROOM 345

Some equipment for the New Library will have to be stored in Branson before it is moved to the building. We will need to use Room 345 for this purpose. The room cannot be scheduled during this short period of time.

□ □ □ □ □ □ □ □ □ □

BRANSON RENOVATION

The Renovation Committee continues to work with the architectural and library consultants on this project. You have already noticed individuals in the building examining, measuring, drawing, etc. in preparation for this project. Many staff members have already been involved to some degree in providing input to these individuals and firms.

From "Library Update / New Mexico State University Library", February 3, 1992.

NMSU Receives \$3 Million Naming Gift for Library from Zuhls

Herbert and Joan Zuhl of Las Cruces have donated a record \$3 million to NMSU as a naming gift for the New Library. The Library will receive the earnings from the endowment, which will be managed by the NMSU Foundation. According to **Joe Creed**, Interim Vice President of University Advancement, the ultimate gift from the Zuhl's estate could be as much as \$6 million. The Library will display the couple's extensive collection of petrified wood, which is millions of years old, and other geological artifacts such as meteorites and fossils. **Ron Jordan**, Assistant Vice President of University Advancement, met with the Zuhls for several months to plan the gift.

Former New Yorkers Herbert and Joan Zuhl moved from Manhattan to Las Cruces ten years ago. They first visited Las Cruces on a vacation trip. Herbert worked as a chemist for several large companies. In 1970 they dug up a piece of petrified wood "for the fun of it" on private property near Holbrook, Arizona. This led to the establishment of a very successful business selling the petrified wood to architects, collectors, and others. Now retired, the Zuhls enjoy their life in Las Cruces. Joan is an artist and Herbert enjoys golf, riding a motorcycle and activities as a Mason. Each of NMSU's regents praised the Zuhls as they stood before an applauding audience at the March 24 meeting of the Board of Regents. Herbert Zuhl said "We have always been interested in promoting education because it is one of the answers to the world's problems."

Zuhl Library will showcase geological artifacts from the collection of **Herbert and Joan Zuhl**. Photo, Mike Mitchell.

"We look forward to a long-term working relationship with the Zuhls to present their collection and to honor their support."

Interim Dean of the Library **R. David Myers** said "The University Library is very excited to receive two generous gifts from Herbert and Joan Zuhl. We will be honored. (Naming... continued on page 14)

Naming...

(continued from page 1)

to house and display the wonderful geological artifacts that Mr. Zuhl has collected and preserved. These artifacts will work perfectly in the building that will be named for the Zuhls and make the Library one of the great showcases of the Southwest. The endowment provided by the Zuhls will make the quality margin of difference.

The generous contributions of the Zuhls will enable the Library to acquire important collections and develop new, cutting edge services that will greatly enhance the education of NMSU students and support important research by University faculty. All of us in the NMSU Library are honored to have their support and are excited about naming our building after these two wonderful people. We look forward to a long-term working relationship with the Zuhls to present their collection and to honor their support."

Zuhl Library Receives Name in Gala Celebration

The library was the place to be on June 16 when the New Library received a name during the Zuhl Library Naming Celebration, attended by over 325 people. Zuhl Library was named for **Herbert and Joan Zuhl** of Las Cruces who donated a record \$3 million to NMSU as a naming gift. Zuhl Library also showcases the internationally recognized Zuhl Geological Collection of petrified wood, fossils and minerals.

The Zuhl Library Naming Celebration began with a trumpet fanfare in the Library courtyard. The Master of Ceremonies was **President William B. Conroy**. Herbert Zuhl unveiled the Zuhl Library sign and Joan Zuhl did the honors at the ribbon cutting.

The celebration continued in the Zuhl Library lobby with speeches by **President Conroy**, Regent **James Manatt**, Library Dean **Elizabeth A. Titus**, Head of the Department of Geological Sciences **Thomas Giordano**, Interim Vice President for Advancement **Joe Creed** and **Mr. Zuhl**.

The festivities then moved to the third floor of Zuhl Library where the honorees and guests were treated to a gala reception, including the music of a string quartet and madrigal singers, library tours and refreshments. Enjoy with us some photos commemorating the celebration:

Joan Zuhl cuts the Zuhl Library ribbon.

Library Adds New Electronic Classroom

by Sylvia Ortiz, Associate Professor, Branson Reference, sortiz@lib.nmsu.edu

The Branson Hall Title V Classroom is nearing completion in time for New Mexico State University's Fall Semester. An area on the third floor east of Branson Hall has been renovated with funds from a U.S. Department of Education Title V campus-wide grant from the Developing Hispanic-Serving Institutions Program. The new electronic classroom will serve primarily to teach NMSU faculty members how to incorporate teaching technologies into their curricula. A schedule of classes will be announced. The menu of possible teaching technologies includes Microsoft Powerpoint, WebCT, Microsoft Front Page and Adobe Illustrator, among others. If you are interested in particular software, contact (Electronic Classroom...continued on page 10)

New Branson Hall Title V electronic classroom nearing completion. Photo, NMSU Title V Project.

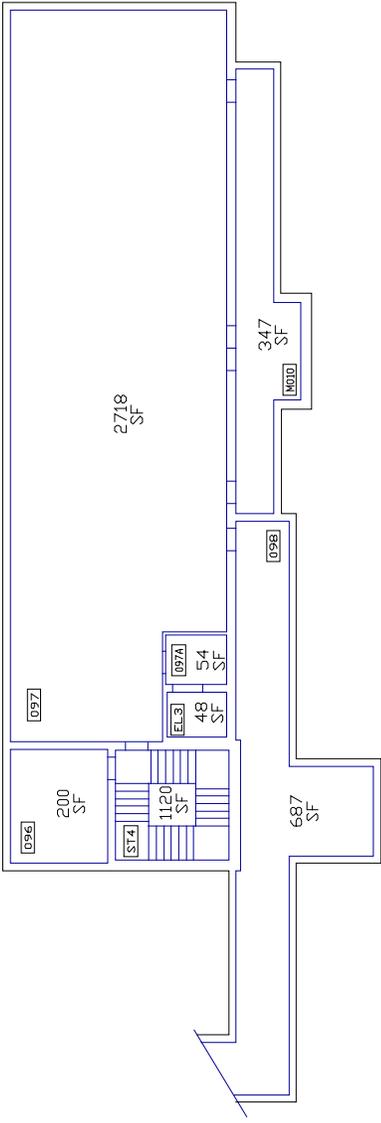

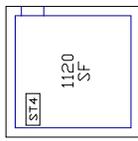

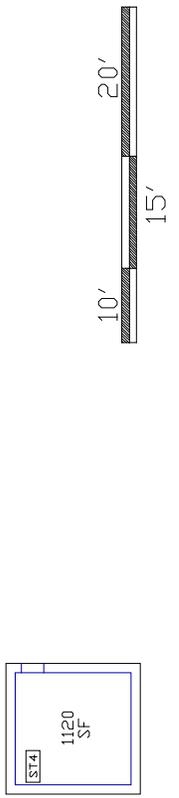

Electronic Classroom...

(continued from page 1)

Sylvia Ortiz, Library project director, at 646-7481 or sortiz@lib.nmsu.edu and offer your suggestions.

Additionally, the classroom will be used to support the Library's instruction program which includes course-specific library instruction sessions and the Library's for-credit information literacy course, LSC 311. The new classroom is the third electronic classroom in the Library, joining the Branson Hall Electronic Classroom and the Zuhl Library Electronic Classroom. For course-specific instruction contact **Kate Manuel**, Instruction Librarian, at 646-6932 or kmanuel@lib.nmsu.edu, and she will arrange for a session.

Zuhl Library

This building was originally known as the “New Library.” It was authorized for construction in 1988. It was designed by Dean/Krueger and Associates. Construction began in 1990 and was completed in 1992. The general contractor was Frank Tatsch Construction, Inc. It was renamed Zuhl Library on June 16, 2000.

Herbert and Joan Zuhl

“Joan and Herbert Zuhl established an endowment through the New Mexico State University Foundation that will provide financial support in perpetuity for the Library, the Department of Geological Sciences, and scholarships. They also made a gift to New Mexico State University of their remarkable collection of geological artifacts, including meteorites, fossils, and petrified wood.

In recognition of the Zuhl’s generosity and in honor of their commitment to education, the Board of Regents of New Mexico State University named this building the Zuhl Library.” (From the dedication plaque.)

Re: Equine Education Center
OFS Project No. 01014H

Dear Sam:

By way of this letter, I am requesting that the name of the building currently listed on plans as Equestrian Support Building be officially changed to "Equine Education Center". This designation most accurately represents the function of this facility. This name should be on the official plaque listing the names of the Board of Regents.

If you have any questions, call Dinus M. Briggs at 646-1123.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jerry G. Schickedanz'.

MEMORANDUM

TO: Jerry Schickedanz, Dean
College of Agriculture and Home Economics

FROM: Mark Wise
Department Head
Animal & Range Sciences

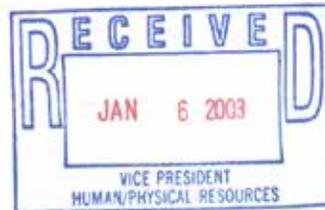

DATE: 12/17/02

SUBJECT: Name of New Building

I would like to propose to name the building currently being constructed as the Equine Education Center. I know that blue prints have titled the building as the Equestrian Education Building but this name is not inclusive of all activities that will go on in the building.

*Ben Woods
I concur with the name
change to Equine in place of
Equestrian.*

1-2-03

Equestrian Building & Equine Education Center

The groundbreaking ceremony took place June 25, 2002 and construction began in June of 2002 after almost 5 years in the planning stages. It will be completed within the next month when it will become home to the Animal and Range Sciences Horse program and the national champion NMSU Equestrian Team. This building was funded through severance tax bonds, general obligation bonds, and the College of Agriculture and Home Economics. Funds totaled \$675,000.

Site of Dairy Building

The NMSU Dairy Building originally occupied this site. The Dairy Building was constructed in 1918 for the Dairy Department chaired by Professor Omer C. Cunningham. Dr. Samuel R. Skaggs, Jr., Professor Emeritus Animal & Range Science later chaired the department. In 1982 the building was occupied by the Engineering Technology Department until it was razed in 1996 for construction of Engineering Complex III.

Engineering Complex III

Engineering Complex III (ECIII) was constructed where the old Dairy Laboratory, building #43, used to stand. The building's construction was authorized in 1994. Its construction began in 1995 and was finished in 1997. The architect was Flatow Moore Shaffer McCabe Architects. The University Architect was Martin Hoffmeister. Wooten Construction Company was the general contractor.

Skeen Hall

Originally called CSDAL or Center for the Sustainable Development of Arid Lands is now known as Skeen Hall. Finished in 2000, this building hosts the departments Agronomy and Horticulture, Cooperative Extension Service Plant Science, and Entomology Plant Pathology and Weed Science. Skeen Hall was designed by Van H. Gilbert, Architect, and Shepley Bulfinch Richardson and Abbott Architects. Martin Hoffmeister was the University Architect in charge of the project. Jaynes Corporation was the general contractor.

Skeen Hall was named in honor of U.S. Representative Joe Skeen and his wife on December 15, 2000. Representative Skeen helped to obtain federal funding for the building and his wife, Mary, was the longest-serving delegate to the national Council for Agricultural Research, Extension and Teaching. In a contest sponsored by The New Mexico Building Branch of Associated General Contractors and the New Mexico Business Journal, Skeen hall was recognized as one of the “2001 Best Buildings” in the category of exteriors. The architect for this building was Van H. Gilbert, PC. Construction cost was \$21,478,049. \$10,738,049 came from a federal USDA grant and \$10,740,000 came from severance tax bonds and general obligation bonds.

Congressman Joe Skeen & Mary Skeen

“Congressman Joe Skeen was the first New Mexican elected to Congress through a write-in vote and the first New Mexican to serve in the U.S. House of Representatives for more than 20 years. Congressman Skeen was essential to supporting agricultural research, teaching and extension by directing research funding to NMSU that addressed New Mexico problems; establishing the Rural Economic Development through Tourism extension program; advocating the establishment and funding of the International Arid Lands Consortium, of which NMSU is a part; advocating federal funding that made both this building [Skeen Hall] and the headquarters facility of the Jornada Experimental Range possible; and much more.

In 1987, Mary Skeen was appointed to the National Council on Agricultural Research, Extension and Teaching, which identified needs of the land-grant system and addressed those needs. She became the longest-serving New Mexico delegate to the council. Both of these New Mexico natives were vital to establishing NMSU’s place in the world’s scientific community.” (From the Skeen Hall dedication plaque.)

Archway along the south side of the east wing.

Archway along the west side of the north wing.

Wooton Hall (Jornada USDA Experimental Range Headquarters)

Wooton Hall was constructed in 2002, and is not owned by the University.

Elmer Ottis Wooton

Mr. Wooton was appointed in 1890 to New Mexico College of Agriculture and Mechanic Arts as the first resident plant taxonomist. In 1911 he joined the United States Department of Agriculture, and he was “instrumental in the establishment of the Jornada Range Reserve (now known as the Jornada Experimental Range). In 1912, he was the first supervisory scientist of the Jornada Range and served until 1915.” He lived from 1865-1945. (From a display in the main lobby of Wooton Hall.)

Branch Campuses and Other Remote Locations

New Mexico State University is most defiantly an entity that has a solid presence in New Mexico.

The university has stretched its reach to remote locations with in the state such as Tucumcari, Portales, Grants, etc. These great distances enable the university to study a broad range of topics that could not as easily be studied at the main campus location.

History of San Juan College

San Juan College was founded in 1956 as the Farmington Branch of the New Mexico College of Agriculture and Mechanical Arts, in accordance with statutes of the State of New Mexico. All classes were initially taught by part-time instructors during evening hours in facilities at Farmington High School. In 1958, the name was changed from Farmington Branch to San Juan Branch, NMSU. This name better indicated the area served by the branch.

In July 1965, the Farmington Board of Education allowed the college to use full-time, a building on North Wall Avenue near downtown Farmington. This space allowed for full-time day and evening instruction; however, laboratories and other special facilities at Farmington High School were still used for evening instruction.

During the 1966-67 year, applications for a federal grant to assist in the construction of a separate facility for a branch campus were prepared and approved. The Farmington City Council returned to the Bureau of Land Management 590 acres of land, previously obtained by the city for park and recreational purposes, with the promise that the land be made available to New Mexico State

University (NMSU) for branch campus development. Thus, with the first building constructed in 1967-68, San Juan Branch had a permanent site in the northern part of Farmington.

Also during the 1967-68 academic year committees composed of members from all areas of the county prepared a feasibility study for an area vocational-technical school at the San Juan Campus. An operating agreement between the Board of Regents, NMSU, and the Boards of Education of Aztec, Bloomfield Municipal, Central Consolidated, and Farmington Public Schools was executed. On August 10, 1968, the New Mexico State Board of Education designated San Juan Branch an area vocational-technical school.

From the first phase of construction in 1967 to 1981, the college as a branch campus experienced three successful local bond issues to substantially support three of the college's major construction projects, four phases of construction, several marked changes in administrative structure, and rapid enrollment growth. Campus facilities increased from 16,384 square feet of space in 1967-68 to 87,442 square feet in 1981, while enrollment in credit courses during the same period increased from 395 to 1604 students. As the community and local school districts invested more money and support in this university branch campus, the natural desire for more local control and autonomy arose. State laws were amended in 1980 to make such a transition possible. Petitions were circulated and a feasibility study for college independence was completed in August 1981. A county-wide election was held on November 17, 1981, which resulted in 87 percent of those voting in the four San Juan County school districts approving of separation from NMSU and financial support for a newly created junior college district. On July 1, 1982, an independent and separate community college known officially as Junior College District of San Juan County, and informally as San Juan College, came into being.

The fifth facility project followed independence and allowed for the expansion primarily of the library and student center. Groundbreaking took place on March 27, 1984, and when completed, added an additional 19,260 square feet to the physical complex. These new facilities were in full use by January 1985.

Phase VI in the San Juan College facilities master plan was a Computer Science Technology Building. Ground for this new 20,000 square foot facility was broken in the spring of 1986 and the building was completed in December 1986. During 1986, the college was further extended into the community with the opening of San Juan College East Center in Aztec and also a Small Business Development Center in downtown Farmington (now relocated to the main campus).

Since 1986, the college has established a San Juan College West Center in Kirtland (1987-88), occupied expanded vocational facilities in fall 1989, and opened an Early Childhood Development Center in January 1990. In August 1988 the voters of San Juan County approved a \$12 million bond issue for further campus expansion by a vote of four to one. Construction of additional science, health, and general classroom facilities began in the fall of 1990 and was completed August 1991. Groundbreaking for a new 83,000 square foot fine arts facility with a theatre and music performance hall, arts and music complex, and community meeting rooms took place in the summer of 1992 and was completed in August 1994. A new 32,000 square foot Educational Services Center, which relocated administrative and student service offices together in

one facility to better serve students, was completed and occupied in December of 1995. In December 1997 a 36,000 square foot addition to the Computer Science Technology Building was dedicated with classes held in the new addition in the spring 1998 semester.

With the completion of the Computer Science Technology Building addition, the campus consists of ten buildings and three off-campus facilities occupying a total of more than 526,300 square feet, and representing a value of more than \$60 million. In 1999, a new Advanced Technology/Enterprise Center and expansion of the Early Childhood Development Center (now the Child and Family Development Center) will increase the multi-campus facilities to about 576,300 square feet. Additionally, the College will begin construction of a Health and Human Performance Center (funded by a \$12 million county wide bond issue passed by voters in September 1998) of about 129,000 square feet, with a year 2000 completion projected. The College supports a wide variety of instructional and support activities for the transfer function, vocational education, and community learning center activities. More importantly, however, as the college has grown, there has been an incremental growth in student population. From its modest start in 1956 with 25 students, the college now has a credit enrollment of more than 5,500 students per semester. Staff size has grown from a handful of part-time instructors to a present complement of 81 full-time faculty, 203 part-time faculty, and other staff for a total of more than 530 men and women to operate the college.

Used to be called "Steel Storage". It was constructed at a cost of \$11,000. (HD)

#169
Shop and tool room
Constructed: ? Late 1940's Early 1950's?
On a March 20, 1963 list it is known as "Hort Machine Shop & Tool Room". This building burned down in April of 1970. Leaving only this foundation. The original square footage on it was 1,300 sq. ft. Currently it has a power building that was built on top of the old slab and a docking bay was attached around 1989.

*Note: This drawing has been prepared for (Space Audit) purposes and is not to architectural drawing specifications. Please inform this office of any changes, errors or omissions required to maintain accurate drawings and database information.
 Room numbers used in this drawing reflect actual room markings where available. Standardize circulation areas, elevators and such are assigned a number by the office for storage and facilities database entry, and they are standardized from building to building. Unmarked rooms are given a last space number based upon surrounding room numbers. It is the responsibility of building occupants to determine appropriate room numbers while this office is the official keeper of the numbers and will assist those needing guidance in room numbering.

REMARKS			

*Note: This drawing has been prepared for Space Audit purposes and is not to architectural drawing specifications. Please inform the office of any changes, errors or omissions required to maintain accurate drawings and database information.

Room numbers used in this drawing reflect actual room markings where available. Stairwells, circulation areas, elevators and such are designated a number by the office for drawings and facilities database entry, and they are standardized from building to building. Unmarked rooms are given a best guess number based upon surrounding room numbers. It is the responsibility of building occupants to determine appropriate room numbers while this office is the official keeper of the numbers and will assist those needing guidance in room numbering.
